INSTRUCTIONS IN TEACHING ENGLISH

The English text book for the 7th form carries on the series of the English textbooks for the 5-11 forms for Tajik schools accepted by the Ministry of Education and Science of the Republic of Tajikistan. It consists of 72 lessons and English-Tajik vocabulary. The whole language material is presented in the following way:

Lessons 1 – 18

Lessons 19 – 36

Lessons 37 – 54

Lessons 55 – 72

The main aim of the textbook is the steady continuation of further mastering of speech habits and skills of the pupils, namely reading and speaking.

It is necessary to pay the teacher's attention to the revision of that methods and devices used in the sixth form.

The teacher should remember that it is advisable to train pupil's ability in speaking.

Every lesson begins with the phonetic drill, which includes choral reading (after the teacher), the learned words and their translation. While reading the words, the teacher ought to teach the pupils to comprehend the meaning of the words by means of guessing through the pronunciation and the spelling of the words.

This way of introducing the international words helps to assimilate the passive vocabulary of the pupils. If the teacher is short of time, he may ask pupils to fulfill this exercise at home.

Some bits of advice of fulfillment the instruction of the exercise «Read the words and sentences. Get some more information». This

exercise helps to learn the words and drill the way of forming different types of questions. This exercise should be done as follows.

The pupils read: He saw.

P1 – Who saw?

P2 – Karim saw.

P3 – Whom did he see?

P4 – He saw Anvar

P5 – When did he see Anvar?

P6 – He saw him on Sunday

P7 – Where did he see him?

P8 – He saw him at the cinema

As to reading texts at the lessons, the teacher should conduct a choral reading of three-four sentences to master the pupils' technique of reading. While reading the text, use the following exercises: translation, putting questions, retranslation, a chain talk and a pair talk.

The teacher should try his best, to realize, all the didactic principles in his class activities, especially:

1) the principle of conscious approach. Conscious approach to foreign language teaching implies the use of the learner native language, we can not eliminate it. To master the English language pupils must have a lot of practice in hearing, speaking, reading and writing in it.

2) The principle of activity is utmost importance since learning a foreign language should result in mastering the target language which is possible, provided the pupil's active participation in the teaching

process, he is involved in language activities throughout the whole course of instruction. The main sources of activity are motivation, desire and interest. The teacher should remember that pupil's interest depends on their progress in the language learning. They need a lot of practice in the use of the language to master it. To solve this problem some ways should be recommended. They are as follows:

a) work in unison as much as possible (while pronouncing words and their translation, while retranslation or reading some texts);

b) work in small groups when pupils are divided into four-five groups and each group receives a special assignment either for reading or speaking;

c) work in pairs, when pupils sitting at the same desk have a pair talk simultaneously;

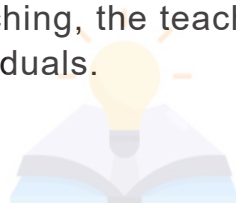

d) mass work, when pupils do the same work in-dependently;

e) begin your lessons with the chorul review of the vocabulary covered;

g) make your pupils-on-duty report about those pupil's being absent (etc.) and tell some topics covered in a funny way;

f) do some topical projects in groups of three-four pupils.

The teacher should activate all the pupils speech activity and involve all the pupils in question and answer work. The teacher must bear in mind the other didactic principles as visualization, sequence, educational sound instruction...) and try his best to realize them at every lesson. Remember that the principle of individualization in foreign language teaching is important. The teacher should assess the progress of each individual in the class. Each pupil should acquire speech habits and skills of the syllabus. In order to apply the principle of individual approach in the foreign language teaching, the teacher should be familiar with the class, with its individuals.

Regarding the ability of the language, the extent of the knowledge, speech habits and skills the English text-book for the 7th form helps to consolidate and extend the language content taught by the 6th form. A large amount of the words in the text-book are proposed for learning.

The words written at the end should be read and translated by the pupils in chorus in order to recall their meaning.

The authors hope that the textbook will contribute to the teaching of the English language at schools. The authors will be greatly indebted for any critical remarks should be sent to the Editorial office of the Publishing house “Maorif”, Dushanbe, 50 Ahmad Donish street.

SUMMER IS THE BEST SEASON FOR US

It is really true that summer is the best season for schoolchildren. Because we have summer holidays and we don't go to school in this season.

June, July and August are the summer months. Usually in these months we go to Camps with our friends and after that we go to the village to visit our grandparents.

My grandparents live in Kamodon village of Mountainous Mastchoh district of Sughd region. In summer the weather is not so hot there, like Dushanbe City. Kamodon village is situated on the bank of the Zarafshan river. The wind blows through Zarafshan river and make the weather cool and it is very pleasant in hot weather. My grandparents are pensioners and they live with my uncle. He is our father's elder brother. He has two cows, many sheep, two goats and a donkey.

Every morning, grandmother feeds us with fresh milk, which is very useful for the body. Besides, they have a big apricot and apple garden. Unfortunately, the fruits are still raw in this period of time, fruits become

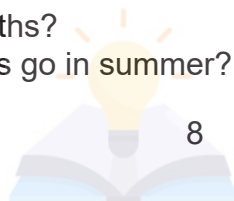

ripe only in October. In Mastchoh Mountainous district because of highlands the weather is cool in November.

We always stay there for 20 or 30 days in summer together with our parents. Our grandparents love all us very much and we love them too. They do all their best to make us happy by hiking in mountains or riding a horse. But mostly we like fresh air, natural pure water and cool weather of Mastchoh in summer season.

1. Answer the questions. Ба саволҳо ҷавоб диҳед.

1. What is the best season for schoolchildren?
2. Why summer season is the best one?
3. What are summer months?

HISTORY OF TAJIK CULTURE (Part 1)

People have inhabited the area now known as Tajikistan since around 4000 BC, when different tribes, distinguished by language, settled the region. The various kingdoms were absorbed into the Persian Achaemenid Empire around the 5th or 6th century BC, which began a long process of Tajikistan being ruled by different empires and cultures. Alexander the Great next conquered the region and incorporated it into the Hellenistic Greco-Bactrian Kingdom. From the late 4th century BC until the early 2nd century BC, the land formed part of the Bactrian Empire. Arabs brought Islam to the area around the 5th century, only to be supplanted by the Samanid Empire. They established Tajik cultural centers in cities that are now in Uzbekistan before the region became part of the Emirate of Bukhara.

1. Answer the questions. Ба саволҳо ҷавоб диҳед.

NATURE

Our Earth is so beautiful. There are a lot of blue rivers and lakes on the Earth. Its oceans are full of wonders. There are high mountains covered with snow and wonderful fields and forests full of different plants and animals. The sun shines high up in the blue sky. At night we can see the moon and millions of stars. One season comes after another and brings changes in weather and nature. There are so many wonderful places to visit and interesting things to see. Nature gives people its riches to live and enjoy.

We can't live without fresh air, clean water, sunshine and a lot of things which we take from the nature. That's why we must take care of it. We must keep our rivers and lakes, forests and towns clean. We must take care of each plant and each animal. We must plant flowers – not pick them up, feed birds and animals in winter – not kill them. Then we'll be happy to live on the most beautiful planet in the Universe.

1. Answer the questions. Ба саволҳо ҷавоб диҳед.

CHOOSING A PROFESSION

«What do you want to be?» the headmaster asked a school leaver who looked fourteen. «An electrician», he answered. «I am very fond of technical things, my elder brother is also an electrician». «Now I see», the headmaster said, «well, boy, you are welcome to our specialized technical school».

«What shall I be?» is a question, which confronts all school leavers.

It is often quite difficult to choose. There are a lot of vocational and specialized schools in our country. They train nurses, turners, bakers, draftsman, fitters, computer operators, dress-makers.

Students learn not only the trade but get a complete secondary education. In our country education is not only free but students of vocational and specialized technical schools get grants.

ABOUT LIBRARIES

There are many big and small libraries everywhere in our country. They have millions of books in different languages. You can find there the oldest and the newest books. Every school has a library. Pupils come to the library to take books on different subjects.

The school library where Orzu studies, is good. It is a large clean room. There are four big windows in it. The walls are light blue. There are a lot of shelves full of books there. You can find books on literature, physics, history, chemistry, geography, biology and other subjects. There are books in English there, too. On the walls you can see pictures of some great writers and poets. On the table near the window you can always see beautiful spring and autumn flowers.

Orzu likes to go to the library. He can always find there something new, something he needs.

WALT DISNEY AND HIS HEROES

Walt Disney was born in Chicago, his father being Irish Canadian, his mother is German-American origin. He revealed a talent for drawing and an interest in photography early on and after service with the American Red Cross in the First World War.

In 1923 he left with his brother Roy for Hollywood and for some years struggled against poverty while producing a series of cartoon films. In 1927 he had some success with the series called «Oswald the Lucky Rabbit», but it was not until September 1928, when «Steamboat Willie» appeared, the first «Mickey Mouse» with sound, that he achieved lasting success. Mickey Mouse became a household word together with such companions as Minnie, Pluto, and – perhaps the favourite of them all – Donald Duck.

THE WEATHER

The weather is a subject we can always talk about. It often changes and brings cold and heat, sunshine and rain, frost and snow. One day is often unlike the next. In summer the sun shines, often there is no wind and there are no clouds in the sky which is blue and beautiful. We can see stars and the moon at night and people like walks, outdoor games and sports in the fresh air.

When autumn comes, the days become shorter and colder. It gets dark earlier and often heavy clouds cover the sky bringing rain with them.

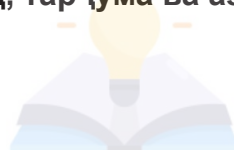

Sometimes there is heavy rain, so that an umbrella or a raincoat is necessary if we don't want to get wet through. Then you can hear people say, «What a bad weather! When is this rain going to stop?» Many people then catch cold and must stay in bed. Then a fire at home is so pleasant. At last frost and snow come.

HALLOWEEN

I'd like to tell you about Halloween. It is an old festival. It is more than two thousand years old. In the past this festival was a time of fear because people believed in ghosts and witches.

Halloween is celebrated on the thirty-first of October. It is a special night, an exciting and funny holiday. There are pumpkins on the windows. They look like faces. Children dress up as witches and ghosts. They have parties and play tricks on people. Children go from house to house and say «Trick or treat!» The grown-ups give them some fruit, sweets, chocolate or money. When there is no treat, the children play a trick on them. A favorite trick is to ring a doorbell and hide. It's really an exciting holiday.

ENGLISH PRIMARY SCHOOL

In Great Britain school begins at the age of five.

At the age of sixteen the children usually leave school. So they spend eleven years there.

There are primary and secondary schools in England. When children are five, they go to primary schools. First they attend infant schools or infant classes. They spend two years there till they are seven.

Their classes are usually informal: they learn to read, to count and to write through different games. They sing songs, dance, look at pictures in interesting books, draw, learn to get on with their classmates. So their lessons are easy, not difficult.

At the age of seven they go to junior schools and stay there till they are eleven. Real school begins. The lessons are more formal. There are different subjects on the timetable. HERO FROM A CITY OF HEROES

From “The Youth of Heroic Leningrad” by V. Ivanov

In the third month of the Great Patriotic War, Leningrad was surrounded by the German fascists.

The people of Leningrad decided to defend their city. There are a lot of stories about brave¹ men and heroic deeds of the Leningrad people. Here is one story of heroism. One unit² of Soviet soldiers perished³. Only Lazarev, a young Soviet soldier of that unit was alive. He was taken prisoner⁴ by a group of German soldiers.

On the way they came to a place which Lazarev recognized. This place was mined. He did not think of his own life. He decided to lead the German fascists to their death. Lazarev thought, “I shall be killed, but I’ll die for my country and at least fifteen fascists will pay for my death with their lives”. He bravely went to the mined field. PALACE OF NATIONS IN DUSHANBE

Palace of Nations also known as the White House, is the official residence of the President of Tajikistan. The president receives foreign dignitaries at the palace and often holds events at the residence. In front of the presidential palace is the Dushanbe Flagpole, which is

the second largest flagpole on earth. The flagpole is 50 meters above the ground level.

The construction of the Palace began in 2000, and was dedicated to Ismoil Somoni, a famous Tajik governor. On the eve of the Shanghai Cooperation Organization Summit in Dushanbe in August 2008, the construction of the palace was completed, with the summit events being partially held under the golden dome with 20-meter columns. An image of the palace is imprinted on the back of a 500 Somoni banknote, which is the national currency of Tajikistan. In September 2018, Belarusian President Alexander Lukashenko became the first foreign leader to visit the new wooden halls and rooms in the palace.

AGRICULTURE OF TAJIKISTAN (PART 2)

Wheat and barley are cultivated in rain fed areas, mostly in the southern plains of Khatlon Region. Rice, on the other hand, is grown in river valleys, where paddies can be easily created by flooding. The main rice producer in Tajikistan is Sughd Region. Fully 44% of the rice harvest comes from Zeravshan and Fergana valleys in Sughd; another 36% is produced in the heavily irrigated Khatlon lowlands and the remaining 20% comes from Hissor Valley, irrigated by the Kofarnihon River. Other crops include potatoes, vegetables, and melons, are grown across the entire country. The north of the country produces apricots, pears, plums, apples, cherries, pomegranates, figs, and nuts.

1. Answer the questions. Ба саволҳо ҷавоб диҳед.

1. Which plants are cultivated in rain fed areas?
2. Where is mostly rice grown?
3. Which region of Tajikistan is the main rice producer?
4. What does the north part of the country produce?

SCIENCE

(Part 1)

Science is important to most people living in the modern world for a number of reasons. In particular, science is important to world peace and understanding the modern technology and the world.

Science is important in keeping peace in the world. On one hand, scientists have helped to develop many modern tools of war. On the other hand, they have also helped to keep the peace through research, which

has improved life for people. Scientists help us to understand the problem of supplying the world with enough energy; using energy from the sun and from the atom. Scientists also analyze the world's resources. Scientists study the universe and how to use its possibilities for the benefit of person.

1. Answer the questions. Ба саволҳо ҷавоб диҳед.

1. What is important to most people?
2. Is science important to keeping peace in the world?
3. What have scientists helped us to understand?
4. What have they also analyzed?

2. Make up sentences with words from the text “Science (Part 1)”.

Бо истифодаи калимаҳо матни “Science (Part 1)” ҷумлаҳо тартиб диҳед.

For example: Science changed our life in different spheres.

3. Find the antonyms of these words. Антонимҳои калимаҳои зеринро ёбед: important, peace, many, modern, scientist, sun, benefit, men, hand, helpful.

For example: helpful – helpless, peace – war.....

4. Read and act the dialogue. Муколамаро хонед ва иҷро кунед.

Aziz: Do you know what do scientists do?

Halim: I think, scientists always invent something new.

Aziz: Yes, you are quite right. They do it to change our life?

Halim: What does it mean?

Aziz: They try to make our work easy.

SCIENCE (PART 2)

Sciences are also important to everyone who is affected by modern technology. Many of things that make our lives easier and better are the results of advanced technology. In some cases, technology of taking salt out of ocean water, may be essential for our lives on Earth.

Scientists are learning to predict earthquakes, to study many other natural events such as storms. Scientists are also studying various aspects of human biology and the origin and developments of the human race. The study of the natural world may help improve the life for many people all over the world.

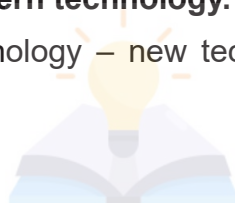

A basic knowledge of science is essential for everyone. It helps people to find their way in the changing world.

1. Answer the questions. Ба саволҳо ҷавоб диҳед.

1. What are the results of advances in technology?
2. What are the scientists learning to predict?
3. What may help people to improve their life?
4. What is essential for everyone?

2. Find the synonyms of these words. Синонимҳои калимаҳои зеринро ёбед: many, to make, events, natural, human, development, to help, to study, various, modern technology.

For example: modern technology – new technology, natural – original.....

3. Complete the sentences using the text “Science (Part 2)”. Бо истифода аз матни “Science (Part 2)” ҷумлаҳоро пурра намоед.

Scientists are also studying ... aspects of human biology and the origin.
2. The study of the natural world may help improve for many people.
3. A basic knowledge of science is ... for everyone. 4. Technology may be essential for our lives on

4. Find out four sentences from the text “Science (Part 2)” with preposition “of” and write them in your notebook. Аз матни “Science (Part 2)” чор ҷумла бо пешоянди “of”-ро ёфта, ба дафтар нависед.

For example: Many of the things that make our lives easier.

COMPUTER REVOLUTION

50 years ago people didn't even heard of computers, and today we cannot imagine life without them.

Computer technology is the fastest-growing industry in the world. The first computer had the size of a minibuss and weighed a ton. Today, its job can be done by a chip the size of a pin head. And the revolution is still going on.

Very soon we'll have computers that we'll wear on our wrists or even in our glasses and earrings.

The next generation of computers will be able to talk and even think for themselves. They will contain electronic "neural networks". Of course, they'll be still a lot simpler than human brains, but it will be a great step forward. Such computers will help to diagnose illnesses, find minerals, identify criminals and control space travel.

Some people say that computers are dangerous, but I don't agree with them.

They save a lot of time. They seldom make mistakes. It's much faster and easier to surf the Internet than to go to the library. On-line shopping makes it possible to find exactly what you want at the best price, saving both time and money. E-mail is a great invention, too. It's faster than sending a letter and cheaper than sending a telegram.

All in all, I strongly believe that computers are a useful tool. They have changed our life for the better. So why shouldn't we make them work to our advantage?

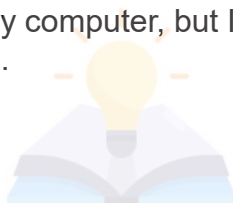

1. Answer the questions. Ба саволҳо ҷавоб диҳед.

1. How many years ago didn't people know about the computer?
2. How do you like computer technologies?
3. How did computer change our life?
4. How will be the next generation of computer?
5. Are the computers dangerous?
6. Do you want to have a computer?
7. Why do you want to have a computer?

2. Make up sentences with the following words. Аз калимаҳои зерин ҷумлаҳо тартиб диҳед.

computer, easier, help, mistakes, make, advantage, dangerous, library, Internet.

For example: I don't have any computer, but I want to have it. Computers can make our work easier.....

3. Make up four sentences about the importance of computer. Дар бораи аҳаммияти компютер чор ҷумла нависед.

For example: As far as I know computers are very important in our life. They can make our work easier.....

4. Answer the question in written form. Ба савол бо тарзи хаттӣ ҷавоб диҳед.

Why do most of scientists and people have their own E-mail (electronic mail)?

LAND RESOURCES

Only 28% of Tajikistan's territory is agricultural land. The total area of agricultural land (4.1 million hectares in 2006), 21% is arable land, 3% and is under perennial crops (orchards and vineyards), and 76% is pastures and hay meadows.

Arable agriculture in Tajikistan relies heavily on irrigation. The irrigated area of Tajikistan has been increased in compare to the former Sovien

period. There was little expansion of irrigation after 1990, and the irrigated area in 2006 is 724,000 hectares. Nearly 70% of arable land is irrigated.

1. Answer the questions. Ба саволҳо ҷавоб диҳед.

1. How many territories of Tajikistan is agricultural land?
2. How many percent of Tajikistan's territory is agricultural land?
3. What does irrigation heavily rely on in Tajikistan?

PERSONAL COMPUTERS

Personal computers are widely used but working on them requires some techniques. A computer gives a lot of advantages to the user. The list of the advantages is rather long: computers give us access to the Internet - an international computer network. You can spend a lot of your free time surfing the Internet and get all sorts of information from it. You can enter the chat room with other Internet users and debate urgent problems on line.

If you are connectable by e-mail, you can correspond with your own web page and place there information about yourself. Today computers help people to do many things. Bankers use them to keep track of money. Telephone operators use them to put calls through. Without computers, weather forecasters would make more mistakes. Computers also help scientists to solve their problems. More than that computers help police to keep order in shops. Computers also help doctors to treat patients. Computers allow users to spend their free time and relax.

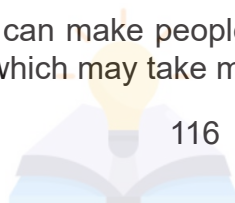

But computers have some disadvantages. Computers can make people lazy. People waste their time when they play different games on a computer. People forget to go to the libraries, they often find information on the Internet. Wicked games can make people, especially children aggressive and lazy.

1. Answer the questions. Ба саволҳо ҷавоб диҳед.

1. What does the computer give to users?
2. What are the advantages of personal computer?
3. What can you do if you have E-mail?
4. How do the computers help people today?
5. Can the computers help scientists to solve their problems?
6. What are the disadvantages of computers?

2. Make up three sentences about the disadvantages of computer. Оид ба ҷиҳатҳои манфии компютер се ҷумла тартиб диҳед.

For example: Computers can make people lazy. Especially pupils will be busy with different games which may take much of their time etc.....

3. Answer the question. Ба савол ҷавоб диҳед.

What kind of organizations mostly need the computer service?

4. Read the dialogue and act it. Муколамаро хонед ва онро иҷро кунед.

Sitora: Do you have a personal computer?

CHANGING FARM STRUCTURE

Up to 1991, agriculture in Tajikistan, as in all former Soviet republics, was organized in a dual system, in which large-scale collective and state farms coexisted in a symbiotic relationship with quasi-private individual farming on subsidiary household plots. The process of transition to a market economy that began in independent Tajikistan after 1992 led to the creation of a new category of midsized peasant farms, known as dehkan farms, between the small household plots and the large farm enterprises.

The large farm enterprises that dominated agriculture during the Soviet period are of marginal importance today.

1. Answer the questions. Ба саволҳо ҷавоб диҳед.

1. When was agriculture in a dual system in Tajikistan organized?
2. When did the process of transition to a market economy begin in Tajikistan?
3. Which enterprises did dominate the agriculture during the former Soviet period?

2. Read and translate the text "Changing farm structure".

Матни "Changing farm structure"-ро хонед ва тарҷума кунед.

3. Name all fruits and vegetables that we can grow in our country.

Номгӯи меваю сабзавотро, ки мо метавонем дар кишварамон парвариш диҳем, номбар кунед.

For example: carrot, cabbage, apple, plum

4. Make up a dialogue. Муколама тартиб диҳед.

INDUSTRY OF TAJIKISTAN

Industrial development in Tajikistan has proceeded slowly and inefficiently both in the former Soviet era and afterward. The civil war and ensuing political turmoil kept production levels low in the mid-1990s.

Tajikistan's industrial development began in the late 1930s. The early emphasis was on processing cotton and manufacturing construction materials. World War II was a major stimulus to industrial expansion. The output of existing factories was increased to meet wartime demands, and some factories moved to the republic from the European part of the former Soviet Union to safeguard them from the advancing German army.

1. Answer the questions. Ба саволҳо ҷавоб диҳед.

1. How has the industrial development in Tajikistan proceeded?
2. Which factors did keep production levels low in the mid of 1990s?
3. When did the industrial development of Tajikistan begin?
4. What was a major stimulus to industrial expansion in Tajikistan?
5. Why did some factories move to our republic from the European part of the Soviet Union?

2. Read and translate the text "Industry of Tajikistan".

Матни "Industry of Tajikistan"-ро хонед ва тарҷума кунед.

3. Put down your own opinion about industrialization.

Андешаи худро доир ба саноатикунонӣ нависед.

For example: After becoming an independent country the leaders of our country are doing all their best to make our Motherland industrial-agricultural one.

4. Find the words from above text concerning industry and learn them.

Аз матни боло калимаҳои ба саноат тааллуқдоштаро ёбед ва аз ёд кунед.

For example: manufacturing, construction, factory....

5. Make up a dialogue. Муколама тартиб диҳед.

A sample:

Gulnora: Is our country agricultural or industrial?

Gulchehra: Our country is going to be industrial-agricultural country.

LESSON 60

Competency: Pupils must have the ability to understand the meaning of the text, to have imagination about the industrialization of the country and answer the questions.

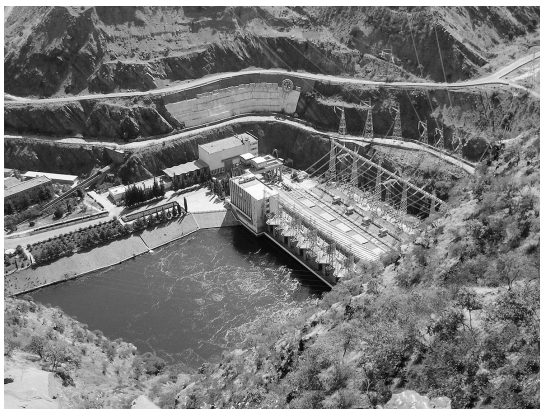

Салоҳият: Хонандагон бояд маҳорати фаҳмидани мазмуни матн ва дар бораи саноатикунонии кишвар тасаввурот дошта бошанд ва ба саволҳо ҷавоб дода тавонанд.

THE ADVANTAGES OF THE VAKHSH RIVER

The Vakhsh River in south part of Tajikistan became a center of extensive industrial development. The river was dammed at several points to provide water for agriculture and cheap hydroelectric power, which stimulated construction of factories in the area. Many of the plants in the valley process agricultural products or provide agricultural materials such as fertilizer. A large chemical plant also uses power from the Vakhsh.

1. Answer the questions. Ба саволҳо ҷавоб диҳед.

**2. Read and translate the text "The advantages of Vakhsh river".
Матни "The advantages of Vakhsh river"-ро хонед ва тарҷума кунед.**

3. Put two or three questions to above text.

Ба матни боло ду ё се савол гузоред.

4. Find the antonyms to these words. Антонимҳои калимаҳои зеринро ёбед.

victory, son, power, after, death, rich, city.

For example: victory – loose, son – daughter...

5. Make up a dialogue. Муколама тартиб диҳед.

A sample:

Suhrob - How many Tajik Hydro Power plants do you know?

Nozanin - Well, I know Norak and Roghun HPP?

LESSON 61

Competency: Pupils must have the ability to understand the meaning of the text, to have imagination about the industrialization of the country and answer the questions.

Салоҳият: Хонандагон бояд маҳорати фаҳмидани мазмуни матн ва дар бораи саноатикунони кишвар тасаввурот дошта бошанд ва ба саволҳо ҷавоб дода тавонанд.

INDUSTRY OF TAJIKISTAN IN THE 1990s

(PART 1)

In the early 1990s, the configuration of industry continued to reflect the specialized roles assigned to Tajikistan within the former Soviet system, hindering advancement of enterprises that utilized the republic's natural resources most effectively. The civil war also made industrial reorganization problematic.

In 1991 industry and construction contributed 43.5 percent of the country of which industry's share was 30.6 percent, but those sectors employed only 20.4 percent of the work force. Tajikistan's heavy manufacturing industries are aluminum and chemical production and a very small machinery and

metalworking industry. The most important light industries are food processing, fabric and carpet weaving.

INDUSTRY OF TAJIKISTAN IN THE 1990s (PART 2)

The most serious declines were in chemicals, engineering, metal processing, building materials, light industry and food processing. According to the government reports, production declines were greater in private owned industries than in state enterprises.

Tajikistan's overall industrial production capacity was underutilized in the first half of the 1990s. The steadily rising cost of raw materials, fuel and energy combined with the old of production equipment and the lack of qualified industrial workers to place Tajikistan industrial products, which were not especially with high quality, and caused disadvantage in foreign markets.

1. Answer the questions. Ба саволҳо ҷавоб диҳед.

1. What kind of industry did face with decline in the mid of 1990s?
2. Why did the cost of raw materials increase in the first half of the 1990s?

ABUABDULLO RUDAKI (858 – 941)

Abuabdullo Ja'far binni Muhammad Rudaki was born in 858 in Rudak village of Panjakent region.

Early in his life, the fame of his accomplishments reached the ear of the Samanid king Nasr II ibn Ahmad, the ruler of Khorasan, who invited the poet to his court. Rudaki became his daily companion. Over the years, Rudaki amassed great wealth and became highly honored. Some feel he deserves the title of "Father of Tajik literature", or the Adam or the Amir of poets even though he had various predecessors, because he was the first who impressed upon every form of epic, lyric, and didactic poetry its peculiar stamp and its individual character.

marifat.tj

He is also said to have been the founder of the diwan, which is the typical form of the complete collection of a poet's lyrical compositions in a more or less alphabetical order, which all Persian writers use even today. He was also a very adept singer and player on the chang (harp).

He was the court poet to the Samanid ruler Nasr II (914 – 943) in Bukhoro, although he eventually fell out of favour in 937. Towards the end of his life, he lived in poverty, and at the same time his poetic style also gained a touching melancholy. He died in 941, leaving behind approximately 100,000 couplets, out of which fewer than 1,000 have survived.

His poems are written in a simple style, having optimism and charm, but as he gets close to end of his life, a touching melancholy gets developed in his poetry. A sample of his poetry, translated into English:

1. Answer the questions. Ба саволҳо ҷавоб диҳед.

1. When and where was A. Rudaki born?
2. Who was the king of Khorasan on that period?
3. How did the king honor him?
4. Is Rudaki the founder of Tajik classic literature?
5. Why do we call Rudaki the “Father of Tajik literature”?

2. Find the Tajik version of this poem and learn it. Намунаи тоҷикии порчаи шеъри зеринро ёфта, азёд кунед.

Look at the cloud, how it cries like a grieving man,
Thunder moans like a lover with a broken heart.
Now and then the sun peeks from behind the clouds,
Like a prisoner hiding from the guard.

3. Find additional information about A. Rudaki and translate them into English. Маълумоти иловагӣ дар бораи А. Рӯдакӣ пайдо наму-да, бо забони англисӣ тарҷума кунед.

For example: A. Rudaki was given the title of “Malik ush shuaro” by Khorasan, king Nasr II ibn Ahmad, that means “The king of poets”....

4. Make up sentences with the words of exercise 2. Бо калимаҳои машқ ҷумлаҳо созад.

For example: The weather is cloudy today...

LESSON 64

Competency: Pupils must have the ability to have an exact understanding about the industrialization of the country and answer the questions.

SCIENCE AND TECHNOLOGY

We live in the fascinating and challenging world of science. It is a world that more and more over the ages, and especially in the 20th century has come to affect so much on our lives. It is involved with the way we travel, the homes we live in and the clothes we wear, how we become ill and how medicine can make us better, and has given us fantastic means of communicating and exploring.

The list of the pressure is rather long. We are on-lookers of great scientific achievements such as television and a computer. We can't imagine our life without a notebook or a radio. I'd like to speak in details about computers. What is a computer? A computer is an electronic device that stores information and allows changes in it through the use of instructions. A modern computer is capable of doing various tasks, like word processing and accounting.

1. Answer the questions. Ба саволҳо ҷавоб диҳед.

1. What kind of world do we live in?
2. What has come to affect on our lives especially in the 20th century?
3. What are the great scientific achievements?
4. Can we imagine our life without new technology?
5. What is computer?

2. Translate these sentences into Tajik. Ҷумлаҳоро ба забони тоҷикӣ тарҷума кунед.

New technologies are very useful for our life. We can find all needy information by Internet through computer. We can do shopping by Internet. I like computer very much.

3. Find out 10 nouns and 10 verbs from the text “Science and technology” and write them in your notebook . Аз матни “Science and technology” 10 исм ва 10 феълро ёфта, дар дафтар нависед.

For example: world, science, way, etc..... come, has, involve, etc....

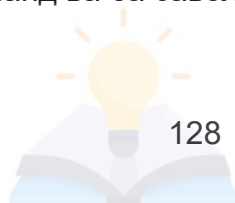

4. Write essay about the role of scientists in the development of technology. Оид ба нақши олимон дар рушди технология иншо нависед.

For example: Mostly scientists are inventors. Only the scientist may invent something new.....

ENTERPRISES IN TAJIKISTAN

A small number of state-owned enterprises dominate Tajikistan's industrial sector. The government's postindependence plans to extensively privatize industry have been hampered, first, by the five-year civil war 1992–1997, and then by the effects of the Russian

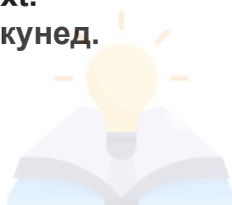

financial crisis in mid-1998 that put concerns about financial stability ahead of privatization. Today Tajikistan is becoming an industry-agricultural country. More than two thousand small and large enterprises are working now. The government of our country is doing all its best to work out most of raw materials in our country. Tajikistan is famous for its fruits and many foreign countries that want to have our fresh and dry fruits. It is a good opportunity for farmers to export their production.

1. Answer the questions. Ба саволҳо ҷавоб диҳед.

1. What kind of industrial sector does dominate in our country?
2. What have been hampered by?
3. How did Russian financial crisis in mid-1998 influence to privatization of enterprises in our country?

SADRIDDIN AINI

(1878 – 1954)

Sadriddin Aini was born in the village of Saktari (now Gijduvan district of Bukhoro region of Uzbekistan). His mother came from the village of Mahalai Bolo of Shofirkon district (now the Bukhoro region of the Republic of Uzbekistan). Aini studied at Bukhoro madrassas, was closely acquainted with prominent Bukhoro intellectuals: Sadri Ziyo, Damullah Ikromcha and others. Sadriddin Aini was a member of the Jadid enlightenment movement.

He took part in the establishment of Soviet power in Bukhoro. In Soviet times, he was mainly engaged in literary activities.

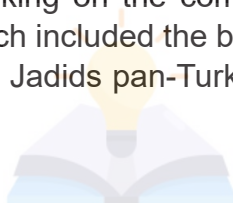

In the early 1920s Ayni helped to propagate the Russian Revolution in Uzbekistan and Tajikistan. In 1934 he attended the Soviet Congress of Writers as the Tajik representative. By purporting national identity in his writings, he was able to escape the Soviet censors that quieted many intellectuals in Central Asia.

He compiled for the first time an anthology of Tajik national creativity “Samples of Tajik literature”. In 1951, he was elected an academician and the first president of the Academy of Sciences of the Tajik SSR.

In addition to his native Tajik, Sadriddin Aini knew the Uzbek language very well and wrote some of his works in both languages. He made a significant contribution to the literature of both peoples.

His main works are: *Odina* (published in 1924), *Dokhunda* (published in 1930), *Slaves* (1934), *Memoirs (Bukhoro)* (1949-1954). He is also an author of works on the history and literature of the peoples of Central Asia.

Along the way, Aini was working on the compilation of an anthology, “Samples of Tajik Literature,” which included the best poetry from Rudaki to the beginning of the 20th century. Jadids pan-Turkists denied the history of

the Tajik people and denied Tajiks the right to be considered a nation. Thus Sadriddin Aini with this anthology proved the existence of the Tajik nation, its history and its right to have its own republic.

He was member of the Supreme Soviet of Tajikistan for 20 years, was awarded the Order of Lenin three times, and was the first president of the Academy of Sciences of Tajik SSR.

Sadriddin Aini died on July 15, 1954 in Dushanbe.

Sadriddin Aini is the founder of Tajik modern literature.

In 1996 he has been awarded the Hero of Tajikistan.

1. Answer the questions. Ба саволҳо ҷавоб диҳед.

1. When and where was Sadriddin Aini born?
2. Where did he study?
3. When did his parents die?
4. Whom was he closely acquainted with?
5. What did he propagate in 1920?
6. What are Sadriddin Aini's main works?
7. When did he become the president of the Academy of Sciences of the Tajik SSR?
8. When has he been awarded the Hero of Tajikistan?

2. Make up sentences with new words of the text “Sadriddin Aini”.

Бо калимаҳои нави дар матни “Sadriddin Aini” буда, ҷумлаҳо созад.

For example: Sadriddin Aini was closely acquainted with prominent Bukhoro intellectuals.....

3. Answer to three questions of exercise 1, in written form. Ба се саволи машқи 1 бо тарзи хаттӣ ҷавоб гардонед.

4. Answer to this question in written form. Ба ин савол хаттӣ ҷавоб гардонед.

SCIENCE AND TECHNOLOGY

Technology has more advantages than disadvantages. It's an open secret that the computer is a source of education, entertainment and communication. And in my life the computer plays a very important role. It helps me to find information and relax.

Though scientists have achieved so much, scientific minds are still working at some urgent problems. I would like to mention some problems. One of them is finding and using alternative sources of energy. Scientists are also learning how to save and conserve energy. They have many problems with creating highly effective systems of communication. I can't mention one of the main problems. It is the development of life on the planet.

I'd like to focus on the problem how to make our life longer and happier. It's a well-known fact that nowadays people have a lot of artificial parts or implants inside them. There are some people who have problems with their

health, especially with their hearts. And surgeons operate them on and put on implant inside them. Surgeons think that within 50 years one person in ten will have at least one artificial part inside.

Because science will be around us even more in the future, I think we-tomorrows adults must start learning today to be ready to take our places in this computerized, transistorized, antibiotic, nuclear and super-sonic age!

1. Answer the questions. Ба саволҳо ҷавоб диҳед.

1. Do the computers have more advantages or disadvantages?
2. What role does the computer play in your life?
3. What are the problems of scientists concerning computers?
4. What problems do people have with their health?
5. What do surgeons think within 50 years?
6. What will be around us in the future?

TAJIKISTAN – THE PRODUCER OF ELECTRICITY

Tajikistan is the world's third-largest producer of hydroelectric power, behind the United States and Russia. However, Tajik Aluminum Plant uses about forty per cent (40%) of the country's electricity production, and Tajikistan had the lowest electricity usage rates among the former Soviet countries, enough for only a few hours a day of electricity in the winter.

Furthermore, only about five per cent (5.5%) of its hydroelectric power production potential had been developed.

The production, transportation and distribution of electricity is under the state-owned joint-stock company Barqi Tojik. But today our country is one of the great producer of electricity. Now all parts of Tajikistan are distributed by electricity. After some years we will have good possibility to export our electricity to our close neighbours, like Afghanistan, Uzbekistan, Kirghizistan and others.

1. Answer the questions. Ба саволҳо ҷавоб диҳед.

1. Is Tajikistan the producer of hydroelectric power?
2. How much electricity does Tajik Aluminum Plant use?
3. Which company is responsible for production, transportation and distribution of electricity in Tajikistan?
4. What is the second largest industry in our country?

2. Read and translate the text "Tajikistan – the producer of electricity". Матни "Tajikistan – the producer of electricity"-ро хонед ва тарҷума кунед.

3. Write three sentences about Barki Tojik.

WATER IN TAJIKISTAN

Tajikistan takes one of the leading positions in the Central Asian region as well as throughout the world on the reserves of water resources.

Large reserves of snow and glaciers are accumulated in the country. The total stock of the ice in glaciers is about 845 km³, which is 13 times more than the annual flow of all rivers of the country.

There are approximately 947 rivers flows through the territory of Tajikistan; the total length exceeds 28500 km. Over 80% of the Amu-darya River flow and 1% of the Sirdarya River flow are formed in Tajikistan. As a whole, it is 64 km³ of river flow per year, which amounts about 55.4% of the total drainage of the Aral Sea basin.

1. Answer the questions. Ба саволҳо ҷавоб диҳед.

1. What position does Tajikistan take in the Central Asian region of water resources?
2. What are accumulated in the country?
3. How much are the amounts of glaciers in the country?
4. How many rivers are there in the country?

2. Read and translate the text “Water in Tajikistan”. Матни “Water in Tajikistan”-ро хонед ва тарҷума кунед.

3. Write the name of lakes of Tajikistan that you know.

AGE AND YOUTH (BY WILLIAM SHAKESPEARE)

Crabbed Age and Youth
Cannot live together:
Youth is full of pleasance,
Age is full of care;
Youth like summer morn,
Age like winter weather;
Youth like summer brave
Age like winter bare.
Youth is full of sport,
Age's breath is short;
Youth is nimble, Age is tame;
Youth is hot and bold
Age is weak and cold;
Youth is wild, and Age is tame
Youth, I do adore!

tame - мутеъ, итоаткор
adore - парастидан
crabbed - серғурбат
pleasance - ҳаловат
brave - ҳасур
bare - маъюб
nimble - чолок
wild - дағал
lame - ланг, очиз
