Dear friend!

Now you have reached the eleventh form and are in your last year at school. After leaving school in summer, you will either go to work or continue your studies at some institution of higher education. In whatever field you may work or whatever subject you may study, you will soon find that a knowledge of English is either very useful or even absolutely necessary for you. That is why you would do well to try and do your best during your last year at school.

As in future life most of you will need the knowledge of English to read books and articles connected with your specialty. This textbook gives you much reading material.

The more you read the better you will remember the words and grammatical constructions and the easier it will be for you to understand them in texts. That is why you should read as much as possible. In the lessons of this textbook there are texts that are quite easy and others that are a little more difficult. Some are shorter others are longer. In some texts there are few words that are new to you, in others there are more of them.

You are expected to remember only those words that are given at the beginning of each lesson. There are lots of new vocabularies in the texts the meanings of which you can understand from the dictionaries. These will make easy the texts for you.

At the beginning of each lesson there are preliminary exercises. After doing these, you will find it easy to understand the new words that have been formed from words that you know already.

It will be easier for you to remember the words and grammar of the texts if you do exercises. There are many exercises in this book which you will find very helpful. Many exercises revise things that you have learnt in earlier years. By doing these you will easily remember everything.

Some of the exercises can be done by pairs or groups of pupils. This will make your work more interesting and easier. You can discuss things and help each other.

A very important thing to remember is that one will always get a better knowledge of a language and will not forget it so easily if one also tries to speak it. The book gives you lots of suggestions for retelling in different ways the stories you read and for making dialogues on them.

If you keep on going to do this in an amusing way, you will enjoy your English lessons much more than you do, and so your classmates and your teacher.

Remember: Where there's a will, there's a way!

ADVENTURES ON THE RIVER

(PART 1)

(From three Men in a Boat by K. Jerome)

We decline to drink the river.

We found ourselves short of water at Hambledon Lock; so we took our jar and went up to the lock-keeper's house to beg for some. George was our spokesman. He put on a winning smile and said: "Oh, please, could you spare us a little water?"

"Certainly," replied the old gentleman; "Take as much as you want, and leave the rest."

"Thank you so much," murmured George, looking about him. "Where – where do you keep it?"

"It's always in the same place, my boy," was the stolid reply: "Just behind you."

"I don't see it," said George, turning round. "Why, bless us, where's your eyes?" was the man's comment, as he twisted George round and pointed up and down the stream. "There's enough of it to see, isn't there?" "Oh!" exclaimed George, grasping the idea; "but we can't drink the river, you know!"

"No; but you can drink some of it," replied the old fellow. "It's what I've drunk for the last fifteen years."

George told him that his appearance, after the course, did not seem a sufficiently good advertisement for the brand; and that he would prefer it out of a pump.

We got some from a cottage a little higher up. I dare say that was only river water, if we had known. But we did not know, so it was all right. What the eye does not see, the stomach does not get upset over.

Comprehension

1. Why did George, their spokesman, put on a winning smile when he spoke to the lock-keeper?
2. Which detail suggests that George's winning smile and polite request had not the slightest effect on the lock-keeper?
3. Quote the lines that show that George was angry and annoyed with the lock-keeper's suggestion.
4. They were very reluctant to drink river water. What, then, made them try it once?
5. Did the river flow westward or eastward? How do you know?

EXERCISES

THE CHIP

Electronic Mini-Marvel that Is Changing Your Life

At its simplest the chip is electronic circuitry: patterned in and on its silicon base are minuscule switches, joined by "wires" etched from exquisitely thin films of metal.

This silicon flake a quarter inch on a side can hold a million electronic components, ten times more than the 30-ton first electronic digital computer, the ancestor of today's computers that calculate and store information, using memory and logic chips. But its most spectacular successor is the microprocessor – “computer on a chip”. It is 30,000 times as cheap as its 30-ton ancestor and can perform a million calculations a second, 200 times as many as its ancestor ever could. ...

Microelectronics implanted beneath the scalp can restore very rudimentary sight and hearing to some of the blind and deaf.

Robots that see, feel, and make simple judgements are entering our factories. Within limits, computers can talk, heed our speech, or read, diagnose illness, model molecules or prospect minerals. ...

chip – чип ё микромодули электронӣ; electronic circuitry – ҷадвалҳои интегралӣ; switch – «шабака (симҳо)»; digital computer – ҳисобмошини рақамӣ; memory chip – асбоби ҳифзкунада; logic chip – унсурҳои мантиқӣ; computer on a chip – мошини ҳисоббарори электроники дар як кристалл; microelectronics – таҷҳизоти микроэлектронӣ.

ADVENTURES ON THE RIVER (PART 2)

(From three Men in a Boat by K. Jerome)

We tried river water once, later on in the season, but it was not a success. We were coming down-stream, and had pulled up to have tea in a

backwater¹ near Windsor. Our jar was empty and it was a case of going without our tea or taking water from the river. Harris was for chancing² it. He said it must be all right if we boiled the water. He said that the various germs of poison present in the water would be killed by the boiling. So we filled our kettle with Thames backwater and boiled it; and very careful we were to see that it did boil.

We had made the tea, and were just setting down comfortably to drink it, when George, with his cup half-way to his lips, paused and exclaimed:

“What’s that?”

“What’s what?” asked Harris and I.

“Why, that!” said George, looking westward.

Harris and I followed his gaze, and saw, coming down towards us on the sluggish³ current, a dog. It was one of the quietest and peacefulness dogs I have ever seen. I never met a dog who seemed more contented⁴ – more easy in its mind. It was floating dreamily on its back, with its four legs stuck up straight into the air. It was what I should call a full-bodied dog, with a well-developed chest. On he came, serene,⁵ dignified, and calm until he was abreast of our boat and there, among the rushes, he eased up and settled down cosily for the evening.

George said he didn’t want any tea, adapted his cup into the water. Harris did not feel thirsty, either and followed suit.⁶ I had drunk half mine, but I wished I had no.

I asked George if he thought I was liked to have typhoid. He said: “Oh no”; he thought I had a very good chance indeed of escaping it. Anyhow, I should know in about a knight whether, I had or had not.

Comprehension

1. What was the matter with the dog? Does the author actually say what was the matter? How do you know, then?

2. How did George reassure his companion as to the possibility of his having typhoid? Was the friend reassured?

3. What were the chains and notice-boards for?

¹ a place at the side of a river or stream where the water does not move

² risking

³ slow-moving

⁴ peaceful

⁵ lessened speed

⁶ did the same

4. What do you think the notice-boards said?
5. What does the author suggest one should do with the chains and boards?
6. "I wonder some of those men don't claim the air of the river ..." What do these words express?

EXERCISES

I. Use a word or a phrase from the passage in place of italicized words.

Ба ҷойи калима ва ибораҳои ҷудокардашуда калима ё ибораеро аз матн истифода кунед.

1. The bombing of peaceful and **defenseless towns** arouses our anger. 2. The Conquistadors declared that the **innumerable** treasures of South America belonged to them. 3. LONDON'S RIVER

The Thames is not only London's river. It is England's river, for it winds its way through two hundred and fifty miles of English villages and towns, of English cities and English country-side. It is a river where swans build their nests, and punters go idling through the hot summer days. It is a river where you may hang over the big bridges and catch a glimpse of the trade routes of all the world.

It has known danger and romance, invasion, and rebellion, gay water pageants and grim justice; and the river itself has always been the life-blood of England.

London's river is a busy, hardworking river, for traffic flows up and down, all day long, every day of the year, bringing wheat and newsprint from Canada, furs from Russia, sugar-cane and sugar-beet from India, wool from Australia, frozen lamb from New Zealand, and a wonderful collection of other goods from nearly every other country in the world.

In order to deal with all the loading and unloading, the Port of London Authority maintains a series of docks covering 4183 acres and 44 miles of deep-water berths for ocean-going ships.

There are two large docks near Tower Bridge, the London and St. Katharine Docks. At these docks, the store-houses are filled with silk and

tobacco, ivory and quicksilver, rubber and tallow, perfumes, spices, wool bales, and wines. There is a wonderful electric wool- piling machine in use at the dock which can pile the bales, weighing five hundredweight each, three high. Another modern invention in use there is an adaptation of the military mine-detector. When bales of rubber are delivered at the docks for export, they are tested by the mine-detector to see that no metal is hidden among the rubber.

The London and St. Katharine Docks are the main warehousing docks in London, and it is here that the London wolsales are held.

DEATH OF GUNNER

(From “The Small Back Room” by Nigel Balchin)

The novel is set in England during World War II. German planes drop queer- looking, brightly coloured objects, which explode when people approach them. These explosions cause many victims, most of whom are children. The bomb becomes a public menace and it is a matter of vital importance to find out how it works. What makes it so difficult is that none of the victims survive and nothing ever remains of the bomb itself. Stuart, a sapper officer in charge of the investigation, asks a young scientist to help solve the problem.

The next thing I heard from Stuart was a telegram which turned up¹ just as I was leaving the office about half-past seven one night. It said, “Number fourteen General Hospital, Lowallen. Urgent.”

¹ came, arrived

I looked up Lowallen. It was a good hundred and fifty miles away and there was no train that would get me nearer than fifty miles away from it before the morning. But there was one at five a. m. that would get me there by nine.

I rang up the hospital. It took me over two hours to get through. Stuart couldn't come to the telephone, but he sent a message saying that the early morning train would do, so I went on that.

The hospital was a good way out of the town, and I didn't get there until half past nine. It was a brand-new¹ place in a big park. They were still building bits of it. As I walked across the park with an orderly² to find Stuart I noticed that the leaves were falling fast. I hadn't even noticed they were turning. That seemed queer, because in peace-time they are one of the things I always look for.

Whatever Stuart had got it wasn't in a ward. It was in a separate block. They wouldn't let me go in at first, but Stuart came out when they told him I was there.

I was rather shocked at the sight of him. He looked absolutely all in.³ His face was yellow and very drawn, and his eyes were bloodshot.

Comprehension

1. Explain in one brief sentence, using your own words, what Stuart's telegram said.
2. What time of year was it? How do you know?
3. "I had not even noticed they (the leaves) were turning." What does this remark suggest about Rice's state of mind?
4. What word suggests that Rice did not know what Stuart had got and why he had been asked to come?
5. What were his first impressions of the hospital and its surroundings?

The doctor hesitated and shrugged his shoulders. I saw Stuart take a deep breath. He suddenly said, loudly and rather harshly: “Peterson! Open your eyes and listen to me.”

The eyelid fluttered and half opened.

“Did Roberts pick that thing up or did he not?”

The panting stopped again. Stuart took a quick step, pushed the doctor away and took the boy’s wrist in his hand.

“Come on now,” he said roughly. “Tell me. Did Roberts pick it up? Come on, speak up, man.”

For just a second there was a pause. Then the boy’s lips moved and he quite distinctly framed the word “Yes”.

“He did?”

The lips said “Yes” again.

“By the end or by the middle?” The lips quivered¹ for a moment and then closed.

“By the end or by the middle?” said Stuart again loudly. He was leaning forward and the sweat was standing on his forehead. The boy’s lips moved and he breathed something. I think it was “Sir”. Stuart’s face broke in a queer way. He didn’t say any more for a moment or two. The boy’s eye was still half open but you couldn’t see anything but white now and the panting had stopped.

Stuart turned to the doctor and said in a level² voice, “I can’t feel any pulse now. I think he’s probably dead.”

The doctor took the wrist, felt for a moment or two, and nodded. He bent over the boy and then straightened up and said:

“Yes. He’s gone.” He looked at Stuart and said gently, “You got some of what you wanted. He said ‘Yes’.”

Stuart nodded. Then he said, “Excuse me a minute,” in an odd voice and went out. The doctor said:

“Go and see he’s all right, old man. He’s had enough. I must see to this.”³

I went after Stuart. Going out I took a last look at the gunner. He was lying just as he had been when I first came in, but he was quite different.

DEATH OF GUNNER (Part 2)

(From “The Small Back Room” by Nigel Balchin)

He said, “Hallo, Rice. It’s good of you to have come.”

I said, “Sorry I couldn’t get down last night. There was no train.” “It doesn’t matter,” said Stuart wearily. “You couldn’t have done anything.”

“What is it? Another kid?”

“No, thank God. It’s a soldier, a gunner. Not that that’s so much better.”

I said, “Is he badly hurt?”

Stuart looked at me in half surprise. Then he looked away and said, “Oh Lord, yes. The only wonder is that he’s still living. He ought to have been dead hours ago.”

“Can he tell you anything?”

“When he’s conscious. There was about two minutes last night when he could talk quite sensibly, and another few seconds early this morning when he was half awake. But since then he’s been right under.”¹

I said, “You’ve been with him all night?”

“Yes. It was the only thing to do. Come inside. I don’t think he’ll come round² again, but you never know”

¹ (slang) has been unconscious

² (colloq) will become conscious

We went into the room, which was quite small. There was a screen round the only bed in it. A nurse was sitting by the bed reading. Stuart nodded to her and she got up and went out.

The gunner was lying propped up with a lot of pillows. You could only see one of his closed eyes and half of the lower side of his face, and that looked absolutely drained and like wax – even his lips. The rest was bandages. He looked a very small man.

I said, “How old?”

“Twenty. Field gunner.”

I looked at him and said in a low voice, “What chance?”

“Oh, none at all. I tell you, he ought to be dead now. Apparently pretty nearly everything that could happen to him has.”

“How much has he told you?”

“Quite a lot. At least, a lot compared with what we knew before.” He opened a notebook. “He was walking up on the old golf course with another chap¹ from his battery. The thing was lying on the hard sand in a bunker. It was a cylinder, just over a foot long and two inches in diameter. At least, that’s what I made of it. He said it looked like a big electric torch, with a cap on the end and all. The pathetic part of it is that being gunners, they thought it might be some sort of shell. It was about the right shape. Then they saw that it wasn’t. Some of it was black and some bright red, but I couldn’t get that bit very clear.” He paused and frowned at his notes. “Did they pick it up?”

Comprehension

1. What were his first impressions of the hospital and its surroundings?
2. In what state did Rice find Stuart? What had Stuart been doing for many hours?
3. Why does Stuart say “No, thank God” in answer to Rice’s question?
4. “Stuart looked at me in half surprise.” In the light of what you know, explain why Stuart looked surprised at the other’s question.
5. What did Rice learn about the case in the first minute or two?
6. What were the names of the two gunners?
7. Why did Stuart have to be with the gunner all the time?
8. Describe the wounded gunner as Rice saw him when he entered the room.

EXERCISES

I. (a) There are many elliptical constructions in the passage, which is characteristic of informal speech. Point out the elliptical constructions and rewrite the sentences in their full form.

Дар порчаи зерин таркибҳои эллиптикии хосси нутқи ғайрирасмӣ зиёд мебошанд. Таркибҳои эллиптикиро нишон диҳед ва ҷумлаҳои дар шакли пурраашон нависед.

I said, "How old?"

"Twenty. Field gunner."

"What chance?"

"Oh, none at all."

(b) Say as much as you can about the events mentioned in these six short sentences.

Дар бораи ҳодисаҳои зикршуда дар шаш ҷумлаи зерини қӯтоҳ маълумот диҳед.

"Had planes been over?"

"They're over here all the time."

"The other chap was killed of course?"

"Oh, yes. Frightful mess."

"Fragments?"

"A few. Nothing to help much."

II. The verb «get» can be used with many different particles. Replace «get», wherever it occurs in the following text, with another verb. Here is a list of possible substitutes:

Феъли «get»-ро бо ҳиссаҳои гуногун истифода кардан мумкин аст. Феъли «get»-ро дар ҳама ҳолат дар матни зерин бо феъли дигар иваз намоед. Рӯйхатти ивазкунандаҳои эҳтимоли инҳо мебошанд:

be; have; earn; arrive at; rise; leave; agree (with); find; meet; survive; return; depress; buy; obtain; forget; become.

"When I was your age," said the old man, "I only got thirty shillings a week. Life was much harder then. I had to get up at six and get to work by seven. We got no holidays and worked ten hours a day for six days a week. There was a lot of unemployment, too, and workers were often told to get out. I got

dismissed once because I didn't get on with the boss, and it was several months before I got another job.

Then the First World War broke out. Well, of course, I joined up, but I was lucky and got through 'it without getting killed or wounded. When I got back after the war, unemployment got worse for a time and it really got me down. I had just got to know a girl, too, but I didn't even have enough money to get a marriage license. It took me two years to get a good job. I've never really got over that period of frustration."

III. Write a short story of your own using «get» with different adverbial particles. See if you can use the word eight or ten times.

Феъли «get»-ро бо ҳиссаҷаҳои зарфӣ истифода намуда, ҳикояи кӯтоҳи худро нависед. Бинед, ки оё ин калимаро ҳашт ё даҳ маротиба истифода карда метавонед?

Discussion

1. Mention all the things that are vital to know about the bomb and the circumstances of the explosion. Explain why it is vital to know them.

2. Stuart spoke harshly to the dying man. Can you justify his attitude? Explain your point of view.

3. From what you have read, what is your impression of Stuart?

4. Why was the work Stuart and Rice were doing so important?

5. The work that sappers do – defusing bombs – is full of risk. Besides being brave these people must be able to weigh up all the dangers and take precautions against them. What is the difference between a sensible risk and a silly risk? Discuss some risks that you think would be worth taking.

IV. Reproduction and Composition

1. Relate an incident from "Death of a Gunner" that you think most impressive.

2. Give a clear account of what happened to the two gunners.

3. Write a simplified version of the passage in words and constructions with which you are familiar.

4. Imagine that it was you who had come upon a "thing" similar to that described in the passage. Describe what it looked like, what passed through your mind, and what you did.

5. Tell of an episode of how people came upon a bomb left over from the war and how an explosion was prevented.

V. Translate the following sentences. Use supposing, unless and in case wherever you can.

Љумлаҳои зеринро тарҷума кунед. Пайвандаки шартии «агар»-ро дар кучое метавонед истифода намоед.

1. Ман шуморо огоҳ менамоям, агар эҳтиёткорӣ накунад, фалокате рух медиҳад. 2. Агар ба дастаи мо боз як баскетболбози дигар ҳамроҳ нашавад, мо дар мусобиқа иштирок карда наметавонем. 3. Агар шабона таги по ях кунад, чӣ мешавад? Мо ба пеш ҳаракат карда наметавонем. 4. Агар сӯзишворӣ тамош мешуд, мо чӣ кор мекардем? 5. Агар ба шумо ёрии ман лозим шавад, ана, суроға ва телефони ман. 6. «Агар хаткашон ояду дар хона ҳеҷ кас набошад, чӣ кор мекард?» - «Ў хатча мегузошт». 7. Агар шумо аз дарсҳо озод нашуда бошед, бояд ба дарсҳо иштирок кунед. 8. «Чӣ мешуд, ки аз Овод хоҳиш намоем барои рӯзномаи мо нависад? Ў ҳаҷвия-нависи бисёр хуб аст» – пешниҳод намуд Рикардо. 9. Дӯстон ҳама чизро омода карда буданд, агар ба Овод фирор кардан муяссар шуда бошад. 10. Овод медонист, ки агар барои даст кашидан аз муҳорибаи минбаъда розӣ нашавад, ҳастии худ-ро наҷот дода наметавонад.

VI. The conditional sentences below are of mixed type of real and unreal condition referring to present, past or future time. Put the verbs in brackets into the correct form.

Љумлаҳои шартии дар зер овардашуда шартҳои омехтаи воқеӣ ва ғайривоқеӣ буда, ба замонҳои гузашта, ҳозира ва оянда мансуб мебошанд. Феълҳои дар қавс додашударо дар шакли замони дуруст гузоред.

1. Supposing we (adopt) this device, would result be any different? 2. I (not do) it unless I had been sure of the outcome. 3. If I (realize) that the traffic lights were red, I'd have stopped. 4. Unless you turn that wireless off, I (not be able) to do any work. 5. Supposing you saw somebody drowning, what you (do)? 6. If you removed the screw, the whole machine (fail) to pieces. 7. Supposing I (press) the button, what would have happened? 8. The newspaper (not print) the story if it hadn't been true. 9. If the pilot (make) one mistake, the ship would have run aground. 10. I shall not forgive him unless he (apologize).

Unless the floods (subside), the road will not be safe. 12. If it (not be) for the driver's quickness, the passengers would have been killed. 13. Unless they leave a lamp beside that hole in the road, somebody (fall) into it.

VII. Fill in the blanks with the, a (or an) or use no article at all.

Чойҳои холиро бо артиклҳои the, a (ё an) пур намоед ё артикл истифода накунед.

BREAKING THE LANGUAGE BARRIER

(Part I)

(By Hartley Howe, from “The Popular Science Magazine”)

Each year, millions of reports on scientific research are published – a big fraction of them in foreign languages. In this mass of Russian, Dutch, Hindustani data are clues to H-power,¹ interplanetary flights, more powerful batteries, long-wearing tyres. The trouble is: too few scientists and engineers read foreign languages. What we need is a machine to read one language and type in another: AN AUTOMATIC TRANSLATOR. We are trying to build – not one but several.

Here's where we stand now.

* * *

The girl sat at the key-board and punched² onto cards the words on the sheet before her. Red lights flashed on and off across a central control panel as the cards were fed into a big computer. There was a moment of suspense, finally broken by the chattering of the automatic printer. “Magnitude of angle,” it spelled³ across the page, “is determined by the relation of length of ...”

¹ nuclear power

² made holes

³ formed words

The machine was “translating” the Russian sentences into English – automatically printing 21 /2 l’nes a second.

It was only a demonstration. The Russian texts were preselected by the experts who programed the computer; the vocabulary was tiny and the sentences simple.

But today, scientists in several countries – particularly the United States, Britain and Russia – are working out the theory behind machines that may break down the language harrier between nations.

The urgent need is for quick, working translations of technical research reports and scientific papers. The linguists and mathematicians don’t expect machines – once they get them – to translate poetry or plays or novels. Literary shades of meaning will be too delicate for even the most complicated machine.

In technology, it’s a different story. Today scientists can’t keep up with progress in their fields in other countries. Sometimes they are held up by problems that have been solved elsewhere.¹ An example: a paper on electric switching networks published in Russian was overlooked by Americans who needed it for five years while American scientists painfully duplicated much of the work, at an estimated unnecessary cost of it 200,000. As for the Soviet moons: the truth is that American scientists worked frantically² to tune in on their signals – only to find later that they could have learned the exact frequencies months beforehand from articles in a Soviet amateur-radio magazine that we had, but didn’t get round to translating.

Russia does it differently: an army of linguists abstracts³ into Russian some 400,000 articles on engineering and science every year, as well as making full translations on request. Right now, the United States can’t come near matching that set-up.⁴ Even if we double the number of Russian scientific journals that are translated and abstracted, our scientists will be getting a look at fewer than half of those that they themselves rate⁵ as “significant for research”.

Experts say valuable material is to be found in at least 59 languages. Even if human translations were not slow and expensive, for many languages besides Russian there’s a frightening scarcity of trained linguists. We’re trying to train them, but the best answer now in sight is a partnership of human translators and machines.

Comprehension

1. The girl was copying onto cards what was on the sheet before her. How did the letters on the cards differ from those on the sheet?
2. Which words in the second paragraph show that the writer was excited at seeing the computer at work? Why did the tension finally break?
3. What does the writer mean by the “language barrier”?
4. Why have scientists limited the field of their research work to scientific papers and technical reports? (Give two reasons.)
5. Why is it important for scientists to read scientific magazines published in other countries, according to the writer?

EXERCISES

I. Explain in your own words the meaning of the following phrases as used in the article.

Бо калимаҳои худ мазмуни ибораҳои зеринро, ки дар мақола омадаанд, шарҳ диҳед.

1) In a big fraction of them; 2) a moment of suspense; 3) scientists are working out the theory behind machines; 4) in technology, it's a different story; 5) it was only a demonstration; each input word; 7) the output language; 8) painfully duplicated; 9) an estimated unnecessary cost; 10) the best answer now in sight; 11) didn't get round to translating; 12) can't come near matching that set-up.

II. Make up two different sentences with each of the following words. In the first sentence use the word as a noun, in the second as a verb.

Бо ҳар яке аз калимаҳои зерин ду ҷумлаи гуногун тартиб диҳед. Дар ҷумлаи аввал онро ҳамчун исм ва дар ҷумлаи дуюм ҳамчун феъл истифода намоед.

1) flash; 2) program (or programme); 3) cost; 4) code; 5) signal; 6) team; 7) match; 8) abstract (note the shift of the stress).

What are the language?

translator

III. In English the word “run” has different meaning. Translate the following sentences giving special attention to the meaning of the word “run”.

Дар забони англисӣ калимаи “run” маъноҳои гуногун дорад. Ҷумлаҳои зеринро тарҷума кунед ва ба мазмуни калимаи “run” аҳаммияти махсус диҳед.

1. The story runs that centuries ago there was a city in this wilderness’ 2. Michael Mont ran for parliament. 3. A wheel runs smoothly 4. This man a transport agency. 5 Dickens’s father ran in debt. 6. The child has a bad cold, his nose runs. 7. Silk stockings often run. 8. Our talk ran on recent events. 9. Rivers run to the sea. 10. Sad thoughts kept running through my head. 11. The ship ran aground. 12. Buses run every fifteen minutes here. 13. The play was successful and ran for several years. 14. Bravery runs in their family. 15. I ran my eye over the newspaper column.

IV. Translate the text.

Матнро тарҷума кунед.

Certain words in some languages don’t exist in others. Russian, for example, has no words for “the” or “a”. These words are vital in English: “give a man air” a man an air”, “give a man the air” are quite different.

Combining a machine with a human editor – who would need to know only one language – might solve some problems. The machine would print all possible meanings of doubtful words and an editor might go over the input copy in advance to adapt it for straight word-for-word translation.

But most experts believe that the best answer is to build a machine that can match everything a human translator does.

Still further in the future are translators that will pick up a spoken statement and turn out a printed text in another language. This will require teaming¹ a computer with a machine that will transform sounds into written symbols – an electronic stenographer.

V. The prefix pre- comes from Latin. It means “before”. “To preselect a text” is to select it before. Explain the meaning of the following words in a complete sentences.

Пешванди pre- аз забони латинӣ пайдо шудааст. Он маънои «қаблан»-ро дорад. “To preselect a text” маънои қаблан интихоб намудани матнро ифода мекунад. Мазмуни калимаҳои зеринро бо ҷумлаҳои пурра шарҳ диҳед.

¹ (Amer.) joining together in a team

Example: *Precaution* is caution calculated and assumed *before* danger actually threatens.

1) prefix, *n* 2) prehistoric, *a*; 3) prearrange, *v* 4) preview, *n* 5) precede, *v*, 6) predict, *v* 7) preside, *v* 8) prelude, *n* 9) preface, *n*.

VI. The prefix “over”-is an old English prefix. Give the meaning of the words in italics in the following sentences.

“Over” пешванди забони англисии давраи қадим мебошад. Маънои калимаҳои ҷудошудаи ҷумлаҳои зеринро шарҳ диҳед.

Намуна: “... a paper on electric switching networks... was overlooked by Americans...” Here overlook means fail to see. Overlook can also mean look over, as in: “The house overlooked the sea.”

1. He put on an overall to keep his clothes clean. 2. The sailor fell overboard. 3. I will *overlook* your behaviour this time. 4. She wears an overcoat in the winter. 5. They were getting anxious because the aeroplane was *overdue*. 6. The tank of water *overflowed*. 7. The tree *overhangs* the river. 8. The car was *overloaded*. 9. The second runner *overtook* the first. 10. He took an *overdose* of medicine. 11. The hospital was *overcrowded*. 12. During the blockade people worked *overtime*.

BREAKING THE LANGUAGE BARRIER

(Part II)

(By Hartley Howe, from "The Popular Science Magazine")

It was World War II use of computers for a special kind of translation – devising¹ and breaking secret codes – that led scientists to consider the possibility of a mechanical translator. For theoretically there's no reason why computers shouldn't do three things as well as – or better than – any human translator!

Remember as much language as their builders teach them.

Locate the words fast.

Deliver all their stored learning – translated.

How would a translating computer actually work? The first step would be to fill the computer's storage system or "memory" with a two language dictionary – words in the "input" language and their equivalents in the "output" language, all stored on code.

In translating, each input word would be fed into the computer, which would search its coded memory for the same word. The computer then would "read" – pick out – the equivalent in the output language, decode it, and print it by teletypewriter. A simple dictionary of this sort, capable of translating a few German words into English, has been built at the University of Washington.

With mechanical translators, there are these complications:

A single word can have several forms. In Russian, for example, one stem word may have 29 different endings. Somehow, the machine must recognize the various forms of the basic word.

A word can have several meanings. In English the word "run", for instance, can mean

54 different things. The computer must pick the one right meaning.

Word order is sometimes quite different in other languages.

¹ thinking out, inventing

Think of the confusion if “man kills lion” were translated “lion kills man”.

Certain words in some languages don’t exist in others. Russian, for example, has no words for “the” or “a”. These words are vital in English: “give a man air” a man an air”, “give a man the air” are quite different.

Combining a machine with a human editor – who would need to know only one language – might solve some problems. The machine would print all possible meanings of doubtful words and an editor might go over the input copy in advance to adapt it for straight word-for-word translation.

Comprehension

1. What examples does the author give to show the disadvantages that the Americans suffered from not being able to read what was in Russian scientific magazines?
2. What is the difference between a full translation and an abstract?
3. What conclusion does the writer come to in comparing the translation which is being done in the USA and the Soviet Union?
4. In how many languages, according to experts, is valuable scientific information to be found?
5. Why does the writer say “frightening scarcity” rather than just “scarcity”?
6. How did the idea of a mechanical translator come about, according to the writer?
7. What are the three things computers should do to make mechanical translation possible?

EXERCISES

I. Translate the following sentences using “*only to + infinitive*”.

Чумлаҳои зеринро бо истифодаи “*only to + infinitive*” тарҷума кунед.

1. Ду нафар сӯхторхомушкунанда кӯшиш намуданд, ки ворида хона шаванд, аммо гармии тоқатфарсо онҳоро ба сӯйи қафо партофт.
2. Ё худро ба сӯйи хона партофт, аммо онро ҳолӣ дарёфт.
3. Сарбози маҷруҳгардида каме аз ҷояш хест, аммо боз ба замин афтод.
4. Ё дуҷум маротиба кӯшиш намуд, аммо боз аз нав комёб нагардид.
5. Онҳо то ба пойгоҳ расиданд, ки қатора аллакай рафта буд.

II. From the list provided, choose the words that may be properly used to fill the blanks in the sentences below.

Discussion and Composition

Computers are now widely used aids for communication, calculation and other activities. Their influence becomes more important every day. Computers take part in designing large engineering projects; they take part in the management of factories; computers are used in colleges and universities for teaching students and checking progress in their studies.

Some people even say that one day computers will be used as a substitute for man's brains. Discuss whether it may be true.

Write a report on the subject: "The fields and branches of science and technique where computers are being used now".

THE CAPITOLINE VENUS

(By Mark Twain, slightly abridged)

Chapter I

(Scene – An Artist's Studio in Rome)

“Oh, George, Oh, George, I do love you!”

“Bless your dear heart, Mary, I know that – why is your father so obdurate?”¹

“George, he means well, but art is folly to him – he only understands groceries. He thinks you would starve me.”

“Why am I not a money-making grocer, instead of a divinely gifted sculptor with nothing to eat?”

“Do not despond,² Georgy, dear – all his prejudices will fade away³ as soon as you shall have acquired fifty thousand dol –

“Fifty thousand demons! Child, I am in arrears⁴ for my board!”⁵

³ Disappear

⁴ I owe money

⁵ Meals at a lodging house

Chapter II

(Scene – A Dwelling in Rome)

”My dear sir, it is useless to talk. I haven’t anything against you, but I can’t let my daughter marry a hash¹ of love, art and starvation – I believe you have nothing else to offer.”

“Sir, I am poor, I grant you.² But is fame nothing? The Hon.³ Bellamy Foodie, of Arkansas, says that my new statue of America is a clever piece of sculpture, and he is satisfied that my name will one day be famous.”

“Bosh!⁴ What does that Arkansas ass know about it? Fame’s nothing – the market price of your marble scarecrow is the thing to look at. It took you six months to chisel it, and you can’t sell it for a hundred dollars. No, sir! Show me fifty thousand dollars and you can have my daughter – otherwise she marries young Simper. You have just six months to raise the money in. Good morning, sir”

“Alas! Woe is me!”⁵

Comprehension

1. State clearly, in one sentence, what the reader learns from the first chapter.
2. What is the sculptor’s opinion of himself? Quote his words.
3. What is the grocer’s opinion of the artist and his sculpture? Quote the actual words of the grocer.
4. What makes the poor artist exclaim in despair: “Alas! Woe is me!”?

Chapter III

(Scene – The Studio)

“Oh, John, friend of my boyhood, I am the unhappiest of men.”

“You’re a simpleton.”

“I have nothing left to love but my poor statue of America – and see, even she has no sympathy for me in her cold marble countenance¹ – so beautiful and so heartless!”

“You’re a dummy!”²

“Oh, John!”

“Oh, fudge!”³

Didn’t you say you had six months to raise the money in?”

“If I had six centuries what good would it do? How could it help a poor wretch⁴ without name, capital or friends?”

¹ Face

² a fool

³ Nonsense

⁴ a miserable creature

“Idiot! Coward! Baby! Six months to raise the money in – and five will do!”

“Are you insane?”

“Six months – an abundance. Leave it to me. I’ll raise it.”

“What do you mean, John? How on earth can you raise such a monstrous sum for me?”

“Will you let that be my business, and not meddle? Will you leave the thing in my hands? Will you swear to submit to whatever I do? Will you pledge¹ me to find no fault with my actions?”

“I am dizzy – bewildered – but I swear.”

John took up a hammer and deliberately smashed the nose of America! He made another pass, and two of her fingers fell to the floor – another, and part of an ear came away – another, and a row of toes was mangled² and dismembered – another, and the left leg, from the knee down, lay a fragmentary ruin!

John put on his hat and departed.

George gazed speechless upon the grotesque nightmare before him for the space of thirty seconds, and then wilted to the floor and went into convulsions.

John returned presently with a carriage, got the broken-hearted artist and the broken-legged statue aboard, and drove off, whistling tranquilly.

Comprehension

1. What is described as a “grotesque nightmare”?
2. What is the effect of John’s energetic efforts on the artist?
3. Where do you think John took the broken-legged Venus?
4. How is the reader made to understand that the artist is still penniless when the six months are up?
5. What does the artist expect to happen at any moment?
6. How do you account for the strange behaviour of the bootmaker, the tailor, the landlord and the grocer?

EXERCISES

I. Complete the following sentences.

Discussion

How do you account for the sudden enthusiasm of the press and the public over the broken-legged statue?

1. What are the chief sources of amusement in the story? (Are they to be found in the plot, in the characters or in the style?) Quote the lines that you find amusing.

2. Is the story merely amusing or does it contain criticism? What does Mark Twain ridicule?

3. What can you gather about the outlook on life and art of the society in which the grocer lived.

Reproduction and Composition

1. State briefly and clearly the contents of each chapter. Avoid using say, tell, or ask. Instead, some of the following verbs might be of use to you:

complain, confess, inspire, refuse, beg, appeal, swear, assure, bewilder, amaze, offer, submit, congratulate, bless.

2. Say everything that John did from the moment he appeared in George's studio.

3. Write a brief sketch of two characters – the sculptor and the grocer – using the evidence of the story to support each point you make.

4. Write a paragraph describing a sculpture that you think beautiful. (It might be a monument in your town.)

5. Make a report about a famous artist whose work was acknowledged only after his death.

6. Give an account of a visit to an art exhibition.

III. -hood, -dom, -ness, -ship, -th, -t, -y are suffixes forming abstract nouns. Fill in the blanks with abstract nouns derived from the words given in the margin.

-hood, -dom, -ness, -ship, -th, -t, -y пасвандҳое мебошанд, ки исмҳои маънӣ месозанд. Ҷойҳои холиро бо исмҳои маъние, ки аз калимаҳои дар сутун овардашуда сохта шудаанд, пур кунед.

PLAY WRITING

Each scene of a play must contain:

The setting

Dialogue

Stage directions

THE SETTING

The kind of place, the time, the character(s) on the stage when the curtain opens, must be clearly and briefly described so that the actors know exactly what is in the playwright's setting.

The back yard in the Keller home in the outskirts of an American town.

The stage is budget on right and left by tall, closely planted poplars. The house is two-storey high.

It is early Sunday morning. Joe Kelter is sitting in the sun reading the Sunday paper. He is nearing sixty. A heavy man of stolid mind and build. A businessman.

Dialogue

Each speech should say something important. Each speech should be brief. Remember always that a play is meant to be acted. The dialogue is the most important part of the play. It must sound real.

Stage Directions

Stage directions say how certain speeches are delivered and how the characters move about, what is happening off stage. The directions are written in the present tense. Study this:

At curtain, Frank Luby, enters through a small space between the poplars. Frank is 32, but balding, a pleasant man, uncertain of himself. He walks in, leisurely. He does not notice Jim.

Eddie (sitting at the table)'. What's all that about? Where is she going?
(Catherine enters with plates, forks.)

IV. Write a short play based either on Chapters I-II-III of the “Capitoline Venus”. Enact your play in class.

Намоишномаи кӯтоҳ дар асоси бобҳои I-II-III-и “Capitoline Venus” нависед. Намоишномаи навиштаатонро дар синф иҷро кунед.

A CAPTIVE IN THE LAND

(Extract from the novel by James Aldridge)

(Part I)

On a flight home from an expedition in the Arctic, a party of British meteorologists spots the wreckage of a plane on the ice. They can see one survivor. One of the party, Rupert Royce, volunteers to parachute down. The survivor is a Russian pilot. He is badly hurt, paralyzed from the waist down.

The promised rescue party never arrives and the two men help each other to live through the darkness, cold, and hunger of an Arctic winter. In the spring they must leave the wrecked plane before the ice breaks. Rupert makes a rough sled on which to push the injured man.

* * *

Their clothes stuck to them now, their beards had become solid and greenish and black with sweat and grease,¹ their hair was long and matted, and their eyes were beginning to suffer from the wind and the glare.

A bird appeared, the first gull with a pink breast and a black ring around its soft neck. Rupert tried to catch it as it settled casually on the sled, but it flew off each time, until he took out the gun and shot it so thoroughly that nothing was left. He was sorry, because they had expected to eat it.

“Next time,” he said savagely to Alexei, “I’ll hit it with my ski.”

¹ Fat

Alexei was too exhausted and too frail¹ now to reply, and Rupert's supply of discipline was becoming too thin to depend on. Alexei was only hanging on by habit, simply by the habit of being alive. For two days he had been almost unconscious, but he could not give in to dying, even though he was always on the rise and fall of it.

"How are your legs?" Rupert asked him gently, hazily.²

Alexei was lying in his bed in the shallow tent slowly regaining awareness and he nodded and watched Rupert.

"I'm still bad luck," he said slowly. "No good to you at all."

"You know, you can't say 'bad luck' like that," Rupert told him. "It doesn't make sense. You can't be bad luck. The whole thing is bad luck."

Alexei nodded.

"I'm going out to take a meridian to see what latitude we're in," he told Alexei. "That bird may mean we are nearer land than we think."

Comprehension

1. Describe the appearance of the two men as the story opens.
2. What do you think their emotions were as they saw a gull settle casually on their sled?
3. What did the appearance of the bird have to do with Rupert's taking a meridian?
4. What was Alexei's condition, and what was Rupert's? Which expressions suggest that they were utterly exhausted?
5. What do the words "but he could not give in to dying" suggest about Alexei's character?

EXERCISES

I. Explain the sentences of the text.

Чумлаҳои зерини матро шарҳ диҳед.

1. Rupert's supply of discipline was becoming. Too thin to depend on.
2. Alexei was only hanging on by habit.
3. ... he was always on the rise and fall of it.
4. His shoulders were raw and bleeding from four weeks of harness.
5. He shrugged at its figure.
6. He knew he was hardly good for four more miles.
7. Their experiences ran quite clearly through Rupert's mind.

¹ thin, weak

² slightly confused

8. He hit it (the bear) on the snout which seemed to stir the long-necked beast a little ... 9. Rupert struggled out of the slush 10. The bear meant a renewal of life.

**II. “Alexei was too exhausted to reply ...” The Latin prefix ex – means out exhausted =worn out, tired out
explore = search out
expect = look out**

When after the prefix ex- a hyphen is used, it usually means formerly; ex-president –one who was formerly president. Give the meaning of the following:

Exit: expel; excavate; exclaim; ex-premier; export; extract

III. Make up sentences with the following words.

Аз калимаҳои зерин ҷумла тартиб диҳед.

strong; wreck; renew; idiot; sorry; stupid; exhausted; thoroughly; lose; hate.

IV. Say whether the italicized words in the following sentences are used literally or metaphorically. Explain the metaphorical use?

Гӯед, ки оё калимаҳои ҷудошуда дар ҷумлаҳои зерин бо маънои таҳтулафзӣ ё маҷозан истифода шудаанд?

1. They ate the raw ribs of the bear.
Rupert's shoulders were raw.
2. Rupert felt a blind hatred of his circumstances.
In his old age Milton became blind.
3. He hurled insults at us.
Rupert hurled a lump of ice at the bear.
4. Don't stir
We were deeply stirred by his sad story.
5. There was a painful pause. We all felt awkward.
The sores on his legs were painful.
6. Rupert's right leg was stiff.
His manner was very stiff and formal.
7. He stumbled over the word.
The bear began to stumble off.

8. His heart bled to see his friend in misery.
His shoulders were bleeding.
9. The old ice was breaking up with startling explosions. School breaks up in June.
10. He plunged into the argument.
I plunged my hand into the icy-cold water

V. In the following dialogue, arrange the words in brackets so as to show that either the action has been done by the doer himself, or the doer has caused it to be done by someone else, or he has undergone or suffered something in an accident. Learn the dialogue by heart.

Anne: Yes, I (have – seen – him) twice.

Mary: (you – have – sent – the news) to his mother?

Anne: Yes, I (had – sent – a telegram) to her by John's secretary. His mother (has – answered – it) already.

2. Indirect Speech

Here is an important point to remember.

“He said (told me) that . . .” is commonly used in indirect speech. But constant use of said and told becomes wearisome. According to context, the verbs to remark, to state, to assert, to affirm, to declare, to promise, to demand, to forbid, to exclaim, to urge may all be used for plain statements, and if the statement is in reply to another one, we will naturally use the verbs replied, answered, retorted, etc., as the context suggests.

<i>to greet:</i> “Hello! How are you?”	He greeted me cordially.
<i>to suggest:</i> “Let’s go to the cinema tonight,” Peter said to Alec.	Peter suggested to Alec that they should go to the cinema that night.
<i>to promise:</i> “I will help you,” John said.	John promised to help me.
<i>to refuse:</i> “I won’t go to school today,” said the boy.	The boy refused to go to school.
<i>to forbid:</i> “Don’t go swimming in the river,” Father said.	Father forbade me to go swimming in the river.
<i>to exclaim:</i> “Oh, George, my own darling, we are saved!”	Mary exclaimed in delight that they were saved.
<i>to deny:</i> “I haven’t seen him anywhere.”	Mary denied that she had seen him anywhere.”

A CAPTIVE IN THE LAND

(Part II)

(Extract from the novel by James Aldridge)

The ice, too, was beginning to be wet. Two days of sledging through the first puddles had soaked Rupert and Alexei to the skin, and now it was raining or slushing intermittently,¹ with the sun breaking through a whitish-grey sky. What Rupert also wanted to do was to work out, secretly, a longitude so that he could know exactly where they were.

Rupert erected a shelter with the sled and a piece of parachute silk, and though his shoulders were raw and bleeding from four weeks of harness, though his right leg was stiff, he made meticulous² preparations for shooting the sun when it appeared, setting out his watch and the tables and the sextant and then waiting.

When it appeared in the afternoon he went into the tent and began to work it out with the tables.

“Rupert!” Alexei called from the low tent.

“Yes? What’s wrong?”

“Nothing,” Alexei said. “I wondered if you were still there . . .”

“Of course I’m still here.”

“You know, you could go very far without me now,” the weak voice told him. “That’s what you must do.”

Rupert did not reply but simply moved farther away with all his things, out of sight over a dry, high ridge of ice where he sat down to work out his calculation.

He shrugged at its figure. If that were true it was all very stupid. They were still a hundred miles from Patrick Island, and he knew he could not, with all

¹ indistinct cries, as if his mouth were covered

² very careful

the exaggerated determination he could muster,¹ pull Alexei another hundred miles. Thirty more days? He was far too weak, the skin of his shoulders was open and raw and the sores on his legs and inside his arms were so painful when he walked that he had to walk legs apart and arms apart, and he knew he was hardly good for four more miles.

He sat for a long time looking at the wet ice-field. The old ice was breaking up with startling² explosions which he was used to by now, and the thin new ice was still forming. He watched over it and decided that he hated the ice as much as he hated death. He could not think clearly of anything except this blind hatred of his circumstances, the idiocy and the loss – the end to life when life had only been half-lived. It was a colossal and gross stupidity.

Comprehension

1. What, besides their exhaustion, made their situation so dangerous?
2. What details suggest that Rupert's nerves were on edge?
3. Describe Rupert's preparations for shooting the sun and working out their latitude and longitude.
4. What do you think made Alexei say to Rupert: "I wondered if you were still there ..." and later: "You know, you could go very far without me now ..."?
5. Why did Rupert's calculation disappoint and discourage him?

Discussion

1. The opening paragraph sets the atmosphere of the passage. Relate it vividly in your own words, bringing out everything that is implied.

2. What are the chief qualities of the injured Russian pilot, as seen in the passage?

3. What is your impression of Rupert?

4. Suggest a possible end to the adventure of the two men.

5. Suggest a title for the passage.

6. Compare the situation described in this passage with the situation in J. London's story "Love of Life".

7. In what connection are the names of Nansen and Peary mentioned in the story? Give some interesting information about them.

8. Why explore? Three or four hundred years ago a great deal of the world was undiscovered. Now there seems little more to explore and yet exploration still goes on. Discuss whether it is true that there is little more to explore. What kind of exploration and discovery is going on today? Compare it with exploration in the past.

9. One fact has not changed: the qualities necessary for any kind of exploration. What are these qualities? Find and discuss examples of them in the lives of explorers of the past and present.

10. Besides these qualities there are special qualities needed by certain kinds of explorers: ability to stand heights or depths, extremes of heat or cold. Tell of an example of exploration where such special qualities were needed.

Reproduction and Composition

1. In your own words tell the story of the two men, exhausted and starving yet determined not to give in.

2. A vivid account of the scene in which Rupert pursues kills the bear.

NORTH TOWARD THE POLE ON SKIS

I sometimes think of the Arctic as a great, formless creature, waiting grimly and patiently for man to make a mistake that will betray him. One day I made such a mistake, though luckily it cost me only severe frostbite instead of my life.

I moved ahead of the toboggan teams to reconnoiter the trail on skis. After an hour or so I suddenly realized that I had gone too far –I could hear not even the faintest sound of or dogs. I turned into the wind and began to back-track, and then suddenly a screen of swirling snow enveloped me. My earlier ski tracks had been swept away, and I could only crouch low, searching for the small pits in the ice made previously by my ski poles.

I needed both hands on my poles to steady myself and fight the wind, which now caught me full in the face. The frostbite on my face grew worse, a firebrand drawn across my cheeks and nose. But I could spare neither a hand nor time to protect myself.

Finally through the cotton-wool screen of fog and flying snow, I heard the dogs yapping across the ridge that had halted the expedition. I was safe, but I was to wear the mark of my error for weeks – a painful green-and-black nose.

HUMAN ARTISTS GET MAD AT “MONKEY BUSINESS”

Stockholm – A great storm – artistic, legal, financial and political – is raging throughout Sweden ... and all because of an exhibition at the Galerie Christinae in Goeteborg recently.

Six artists presented their work – all in the modern style – but next day, the critics were unanimous in praising one artist: Pierre Brassau.

“Pierre Brassau,” wrote one critic, “an evidently French, typically self-taught master, gives strong brush movements in light and dark blue – often against a dark background. His ‘Play in Red’, ‘Fantasy’ and ‘Composition’ are inspiring.”

Then an evening paper published a picture of Pierre Brassau, showing him at work; he was – a monkey!

The artist then became Topic No. 1 throughout Sweden: papers published pages about him, he appeared on television. It was revealed that the whole business was a trick planned by two journalists. They had found the three-year-old monkey in a zoo near Goeteborg, given him brushes and paint and – banana in hand – encouraged him to paint.

The prospect of having a banana to eat had indeed inspired Pierre to produce a masterpiece in record time: in 15 minutes he had painted a splendid spontaneous picture.

For the first time in Sweden, there was a queue in front of the gallery.

Not only that: at 7 a. m. a prospective buyer telephoned the gallery and asked: “How much is ‘Play in Red’?”

“450 crowns.”

“I’ll come and buy it at 10 o’clock.” But, when he came at 10, he found that somebody else had beaten him to it: already, at 9 o’clock, the picture had gone for 500 crowns!

But dissident voices were raised. The first of these belonged to Gisela Butow – a painter from Munich. She came and removed her works from the walls of the Galerie Christinae. And human artists throughout Sweden were loud in support of her – all protested against the “monkey business”.

SHANNON'S WAY

(Part I)

(Extract from the novel by A. J. Cronin, slightly abridged)

A promising young doctor, Robert Shannon, is deeply interested in important research work: he is trying to find the microbe of a dangerous epidemic disease. The Head of the Department, Professor Usher, is opposed to this work. He makes Shannon work on a series of unimportant tests. It so happens that Usher goes away for several weeks. Shannon decides to complete his research during the Professor's absence.

* * *

February came in with sharper frost, with cold clear sparkling days which stirred the blood. For over a month now I had flung myself, with complete abandon, into my own work. It felt good to be alive.

Naturally, Lomax and Spence¹ noticed my activity, but Smith,² although I occasionally caught him staring at me and biting the ends of his ragged moustache, could not guess what I was up to.³

It was not an easy process I had set myself. Do not imagine that original

¹ Shannon's colleagues

² the laboratory attendant

³ was occupied with

research is accomplished in a fine poetic rapture;¹ before the dawn appears one must drudge² along the labyrinthine ways, or roll the stone like Sisyphus, endlessly uphill.

Yet, after experimenting with, many media, and finding them useless for my purpose, I had at last succeeded in growing a culture which I believed to contain the causal³ organism of the epidemic disease.

As the time at my disposal lessened, I increased my efforts to produce a strong pure strain of this precious organism. I had a key for the side door of the Pathology building that gave me access to the laboratory when everyone had gone. After tea, I returned to the Department, remaining there, submerged like a diver, connected to world by only the thinnest cord of consciousness, in the cool, green-shaded solitude, until midnight boomed across the silent University. These were the most productive hours of all.

I was confident that I could finish this essential phase by the following Saturday, February 1st, and remove all traces of my experiments that same night. It fitted beautifully, like a well-designed mosaic – Professor Usher had written that he would return on Monday, the 3rd, and I should be at my bench, busy with his tests, when he came back.

SUMMARY

How to write a summary?

We frequently summarize conversations, events, and experiences when describing them to someone. Instead of giving a detailed account of a trip we might say, for instance:

Peter was telling me about his holiday on the river. He and his cousin spent a fortnight sailing down the river. They had wonderful weather, though it was a little too hot, rowing all day. They had a very good time.

Reporters are constantly summarizing what they hear and see.

They know they can use a certain number of words and therefore have to select what is most important about the event or speech they are reporting. Let us look at an example.

An unfortunate incident occurred while three girls were on a camping holiday a hundred kilometers away from Moscow. The girls had gone to bed as usual at about 10 p. m. and had gone straight to sleep. No one heard the beginning of a thunderstorm and the steadily rising wind. It was not until a terrific crash woke them that they realized that the rain was beating in at the open flaps and the wind tearing down their tent.

Suddenly the tent heeled to one side, rocked dangerously and collapsed on top of them. In a panic they fought their way out of the tent and a few seconds later stood shivering in the full blast of the storm.

Fortunately they were rescued by a collective farmer and taken to his house, where they were dried out and put to bed. They were none the worse for their adventure and next morning continued their holiday quite happily.

This incident might be summarized in this way:

Three girls camping in nearby woods had a rude awakening on Thursday night when their tent was blown over in a violent thunderstorm. They were rescued by S. Fedorov, a collective farmer, who gave them shelter and food.

You are often asked in class to summarize what you have read in books, magazines, or newspapers. Here, too, you must choose what is most important.

For example, the story “The Capitoline Venus” might be summarized in this way.

George, a poor, gifted American artist living in Rome, loves Mary, the daughter of a rich grocer, who will not let her marry the penniless artist until the young man has acquired fifty thousand dollars. The artist is in despair. All he possesses is his marble statue of America. It is a beautiful sculpture but no one wants it; the grocer calls it a marble scarecrow.

His friend John Smith comes to his rescue. He deliberately damages the statue and buries it in a piece of ground belonging to him. The sculpture is then unearthed and sold as an ancient statue of Venus for the princely sum of five million francs in gold.

George is now rich and can marry the girl he loves.

SHANNON'S WAY

(Part II)

(Extract from the novel by A. J. Cronin, slightly abridged)

On the Wednesday evening of that last week, shortly after nine o'clock, I felt that, at last, the culture was ripe for examination and I stained a microscope slide. It was a crucial moment. Holding my breath, I placed the slide under the lens; then, as the dark forms leaped up against the shining background, I gave a sharp involuntary gasp.¹

The field was loaded with a small, comma-shaped bacillus which I had never seen before.

For a long time I sat immobile, gazing at my discovery. At last, collecting myself, I opened my note-book, and began, with scientific accuracy, to write a specific description of the organism, which from its shape, I named Bacillus C. For perhaps fifteen minutes I continued, but suddenly my concentration was broken by a flood of light through the work-room fanlight.² A few seconds later I heard in the passage, the door opened, and, while I turned cold with consternation,³ Professor Usher walked into laboratory. He wore a suit with a dark cloth cape thrown across his shoulders; and his pale, stiff face was stained with

the grime¹ of travel. At first I could believe that he was real. Then I saw he had just come off the train.

“Good evening, Shannon.” He advanced slowly, in a measured fashion. “Still here?”

I blinked at him across the culture flasks. He was looking at them. “You show remarkable industry. What’s this?”

Utterly unnerved at being caught, I was silent. Why, oh, why had he come back before his time?

Suddenly, behind Professor Usher, I saw that bird of ill omen² – Smith. I realized, then, that I would have to tell him.

As I began haltingly to speak, Usher’s manner grew more distant and severe. When I finished his face was wintry.

“Do you mean that you have deliberately shelved my work favour of your own?”

“I’ll resume the counts next week.”

“Since I’ve been away how many have you done?”

I hesitated.

“None.”

His narrow features turned grey with anger.

“I especially told you I wished our paper finished by the end of this month ... Yet the minute my back was turned ...” He stuttered slightly. “Why? Why?”

Comprehension

I muttered:

“I have to find out about this . .

“Indeed.” Even his nostrils turned white. “Well, sir, let us not beat about the bush.¹ You will abandon it at once.”

¹ talk about everything except the most important point

I felt myself wince,¹ but steadied my unruly nerves.

“Surely my fellowship² gives me some say in the matter?” “As Professor of Experimental Pathology, I have the last word.” I was not easily aroused, in fact my nature was retiring and inoffensive, yet now a reddish haze swam up before me.

“I can’t give up this investigation. I consider it of far greater importance than the opsonin³ tests.”

Usher drew himself to his full height, his lips wire-thin.

“You are a singularly graceless⁴ fellow, Shannon. I observe it in your manners, which are deplorable,⁵ in your dress, totally unsuited to your professional standing, and in your outrageous disrespect towards myself. I am accustomed to co-operating with gentlemen. If I have been lenient⁶ towards you it was because of my belief that with proper guidance you might go far. But if you choose to behave like a boor,⁷ we know how to deal with you. Unless by Monday you hand me a written apology for this unpardonable lapse I must ask you to leave my Department.”

A dead stillness followed.

After a fitting interval, Usher took out his handkerchief and wiped his lips. He saw that he had silenced me and, as usual, his sense of self-interest came to the surface.

“Seriously, Shannon, for your own good, I advise you to take yourself in hand. In spite of everything, I am reluctant to break up our collaboration. Now, if you will excuse me, I have not been home yet.”

With a matador-like sweep of his cape, he spun round and went out. At his departure, Smith stood a moment, then began to whistle softly under his ragged moustache, and, not looking at me, to make pretence of cleaning out Spence’s sink.

GERMS AGAINST GERMS

The first antibiotic showed up in a London lab. Probably it was chilly that September day of 1928, but in the small cluttered laboratory in St. Mary's Hospital there was warmth.

Staphylococcal germs don't like cold and Alexander Fleming was growing staph germs in this lab. He had them in little round dishes. Fleming was studying the way the germs changed, as they multiplied.

That day, as he was examining several cultures, Fleming looked hard at one particular dish. A fleck of something, perhaps entering through the window Fleming sometimes opened, had dropped into the dish. A blue-green mould had grown up around it. What puzzled Fleming was a clear, open circle like a shining shield surrounding the mould.

Fleming knew the clearness meant that some enemy had killed the staph germs in that circle. He guessed that the mould must have given off some substance fatal to the germs.

The mould was a common one. You've seen it on food left around too long. It was caused by the fermentation process long ago discovered by Pasteur. Fleming's new discovery was that this common mould could kill germs.

He cultivated the mould and made a broth from it. Next he infected some mice with streptococci, germs which can cause throat, bone and spine infections, and scarlet fever. He filled other mice full of staph germs and of pneumococci, which cause a type of pneumonia. Then he gave all the mice shots of the broth he had made from the blue-green mould.

All the mice got well. Fleming had discovered penicillin, as he named it. The full name of the mould is *Penicillium notatum*. The words are Latin. *Notatum* means worthy of notice. *Penicillium* means resembling a little broom. Seen under a microscope, the tips of the mould's fibres look very much like a tiny broom.

Бояд гуфт, ки Резерфорд ҳама корро барои муайян кардани фардияти инсон ба анҷом расонидааст. Ман дар ёд дорам, ханӯз дар ибтидои қорам дар Кембриҷ ба Резерфорд гуфтам: «Дар қорхонаамон Х. фаъолият мекунад, ӯ дар болои як масъалаи нодарқоре қор мекунад ва вақт, асбоб ва чизҳои дигарро беҳуда истифода мебарад». – «Ман медонам, – гуфт Резерфорд, – ки ӯ сари як масъалаи нолозим қор мекунад, лекин ин масъалаи шахсии ӯст ва агар ин масъаларо ҳал карда натавонад, он ба ӯ мустақилона фикр қарданро меомӯзонад ва ба дигар масъала, ки роҳи ҳалли худро дорад, майл мекунад». Баъдтар чунин ҳам шуд. Ӯ танҳо ба хоҳири дар инсон тарбия қардани мустақилият ва тафаккури аслии фидокорӣ мекард.

Ин қиссаро ба ман Резерфорд нақл қарда буд. Дар соли 1912 Мозели дар Манчестер тахти роҳбарии Резерфорд қор мекард. Пас аз он ӯ ба назди Резерфорд омад ва дар бораи се мавзӯи имқонпазири қор, ки меҳост иҷро намояд, нақл қард. Яке аз онҳо кори хеле олиҷаноб буд, ки номи Мозелиро дар тамоми олам машҳур қард. Резерфорд зикр намуд, ки ин мавзӯро бисёр

муҳим меҳисобад ва маҳз онро ба Мозели тавсия додааст. Резерфорд хато накард – маълум шуд, ки кор воқеан муҳим будааст, аммо Резерфорд тазаккур медод, ки ин фикр ба Мозели тааллуқ дошт.

Lomax, with his usual half-smile, sat examining his finger nails, while Smith, his back to me, was attending to the cages with apparent indifference. Only Spence showed evidence of concern, and, as I passed his bench, he said, under his breath:

“Anything I can do, let me know.”

Outside, with the cool air striking upon my heated face, I felt oddly lost to be going home in the middle of the forenoon.

Slowly, like a sun swimming out of grey mist, a resolution grew within my troubled breast, I would continue my work independently – yes, somehow, somewhere, alone, I would bring it, successfully, to completion. Why not? Others had worked under almost insuperable¹ difficulties. I clenched my fist ... By heavens. I would do it. I’d get a job somewhere, now ... at once ... and go on.

A THEORY THAT SHOOK THE WORLD

(Part I)

(By Ruth Moore)

Ruth Moore is an American journalist and one of American's best-known writers of science for the general reader. She wrote a number of books on scientific subjects – “Man, Time and Fossils”, “Charles Darwin: A Great Life in Brief”, “The Earth We Live On”, “The Coil of Life”.

The passage below is from her book “Evolution”.

The year was 1832 and he was 23, starting a five-year world cruise as the unpaid naturalist aboard the Beagle – and finding the world full of coincidences, likenesses and differences that the prevailing¹ theory of creation utterly failed to account for. The theory was both explicit² and vague: every species of plant and animal on the earth, it held,³ had come into being at one grand moment in time, presumably⁴ about 6,000 years ago. But which had come first, the oak or the acorn, the chicken or the egg? And why did many living species appear to be refinements⁵ of extinct, fossilized ones? The theory of spontaneous, special, separate creation did not say.

There were men who found the theory incredible, though Darwin was not yet one of them. For the present he was fully occupied with observing, collecting, comparing and wondering.

Comprehension

1. What did Darwin observe during his world cruise on the Beagle that set him thinking, wondering and comparing?
2. In what way was the prevailing theory of creation -explicit, and in what way was it vague?
3. What facts contradicted the theory of spontaneous creation?

A THEORY THAT SHOOK THE WORLD

(Part II)

(By Ruth Moore)

Huge fossil bones from the pampas crowded Charles Darwin's lodgings at Cambridge: he had returned to the University to edit his Beagle journal for publication and to catalogue all the specimens he had collected on the voyage. As he thoughtfully examined the skull of an ancient fossil anteater, he noted the striking and complex ways in which this horse-sized monster of a distant past resembled small, living ant-eaters of today. The extinct animal bore every mark of being the ancestor of the modern, living animal. If it was, then every species could not have been separately created. Many years later Darwin recalled in his autobiography that this was the moment when he fully faced this revolutionary, disturbing thought, the moment when he could no longer deny the undeniable.

Soon afterwards, he went to London to finish work on his journal, which was to become popularly known as *The Voyage of the Beagle*. As he arranged his Galapagos collections, he was impressed again by the likenesses some of the species showed. This time it was the resemblance of living

species to living species that he could not pass over. Every structure, every line, every organ indicated that some of the island finches¹ had developed in their own way from ancestors that had arrived from other islands of the archipelago. If every species had been independently created, why should some details have been repeated and others ignored?

The idea of species haunted² him, and yet to deal with the origin and relationships of all living and extinct groups would certainly be more work than he or any man would dare to contemplate.³ At the least it would require studies of comparative anatomy, instinct, heredity and the thousands of species proper.⁴

Before he pressed on with his work on species, he felt that all his materials from the long trip should be accounted for. His scrupulousness carried him into eight long years of work on barnacles.⁵ Tedious⁶ and wearing though this investigation was, it taught Darwin how the simplest of animals can vary in all their parts.

Comprehension

1. What struck Darwin as he examined and studied the specimens that he had brought from the trip?
2. What conclusion was he inevitably coming to?
3. Why does the author call Darwin's idea a "revolutionary, disturbing" thought?
4. "... he could no longer deny the undeniable." What is meant here by "the undeniable"?
5. Why didn't he write a book on species as soon as he returned to England?
6. To what did he devote eight long years of his life?

A THEORY THAT SHOOK THE WORLD

(Part III)

(By Ruth Moore)

In 1854, with the last of 10,000-odd¹ tiny barnacles shipped out of the house, Darwin wrote to his friend Joseph Hooker, director of the Botanical Gardens at Kew, that he was resuming his work on species. Both Hooker and the geologist Lyell urged him to proceed with it. Even so it was three years before he even began the comprehensive² book he had been planning for so long. Darwin might have buried himself in his vast subject for another decade or more if an incredible turn of events had not hustled³ him into putting it in print. In his post on June 18, 1858 came an essay by Alfred Wallace, a naturalist in Malaya with whom Darwin had been corresponding. In a few pages Wallace had summarized the main points of the theory on which Darwin had spent over two decades.

Stunned,⁴ Darwin hurried off a note to Lyell: “I never saw a more striking coincidence ...” He said he would of course offer to submit Wallace’s work for

publication, although Wallace had asked him only to forward it, if he thought it worthy, to Lyell. Darwin wondered, though, if he could honourably publish his own sketch now: “I would far rather burn my whole book than that he or any other man should think I had behaved in a paltry¹ spirit.”

Comprehension

1. What was the incredible turn of events that the author writes about?
2. What facts suggest that Darwin was a loyal and honourable man?
3. What was the result of Lyell’s and Hooker’s interference?
4. What was the reaction of the Linnean members to what Darwin’s paper said?
5. What was the Linnean Society’s decision concerning the paper by another naturalist asserting the fixity of species? How do you account for it?

EXERCISES

Discussion

1. Explain as simply as you can how Darwin’s theory of evolution accounts for the origin of species. What are the facts that support his theory?
2. Why is Darwin’s theory of evolution a revolutionary theory?
3. What features, essential to a scientist, did Darwin possess?
4. What lesson can a young scientist learn from Darwin’s biography?
5. What evidence is there to show that the storm that broke after the publication of Darwin’s books has never wholly abated?
6. What is there about this text that makes it literary prose and not merely a scientific report? In other words, if you were writing a scientific report, what would you leave out?

In February 1871, "The Descent of Man" was published. "On every side it is raising a storm of mingled¹ wrath,² wonder, and admiration," said one magazine. The Times printed a six-column article of pained disapproval. The writer held it deplorable³ that Darwin should cast doubt on man's God-given status at the very moment when the Commune had been established in Paris and dangerous, unsettling ideas were spreading in England. It was no moment, the reviewer scolded, for Darwin to rock the foundations of society and the state.

When Darwin started his career, the doctrine of spontaneous, special creation could be doubted only by heretics. When he finished, the fact of evolution could not be denied. He demolished⁴ the old theory with two books. One he entitled "On the Origin of Species". The second he called "The Descent of

NEW DISCOVERIES AMONG AFRICAN CHIMPANZEES

Back in 1960 I discovered that the Gombe chimps use grass stalks, twigs, and sticks as primitive tools for feeding on termites and ants. Now we found another exciting new tool used among these apes.

By chance we noticed Evered, a young chimp, reach out, pick a handful of leaves, and put them in his mouth.

As we watched, Evered took the leaves out of his mouth in a crumpled, slightly chewed mass. Holding them between first and second fingers, he dipped them into a little hollow in the trunk beside him. As he lifted out the mashed greenery, we saw the gleam of water. Our eyes opened wide as we

¹ by that

² disturbance, agitation

watched Evered suck the liquid from the leaves. Again he dipped his home-made “sponge” into the natural bowl of water, and again he drank. He had cleverly modified a natural object to adapt it to a specific use. A new tool!

We have also seen the chimpanzees using leaves for yet another purpose: they often wipe themselves clean of any sticky or unpleasant substance – mud, blood, food residue.

Thus the chimpanzee puts to good use many of the objects of his environment: sticks and stems to probe for insects as food, and leaves for drinking and wiping himself.

At the meeting of the British Association for the Advancement of Science at Oxford in 1860, the outrage still was growing. Three papers attacking Darwin were presented, and the word spread that the bishop of Oxford would take the platform to “smash Darwin”, who was not present. When

the bishop appeared, a crowd of 700 filled every inch of the meeting-room. For half an hour the bishop savagely attacked Darwin and then, turning to Thomas Huxley, a defender of Darwin, he icily put his famous, sneering¹ question: Was it through his grandfather or grandmother that Huxley claimed descent from an ape?

The biologist strode forth to answer. Reaching his climax,² he told the audience that he would feel no shame at having an ape for an ancestor - but that he would indeed be ashamed of a brilliant man who plunged into scientific questions of which he knew nothing. In other words Huxley would prefer an ape to the bishop for an ancestor, and the crowd had no doubt of his meaning.

Pandemonium³ broke forth at this direct insult to the clergy. Men jumped to their feet shouting. In the uproar, a lady fainted. Admiral Fitzroy, the former captain of the Beagle, waved a bible, shouting that it, rather than the viper⁴ he had harboured⁵ on his ship, was the true authority. Hooker said that his blood boiled in anger at the attack on Darwin. "Looks of bitter hatred were directed to those who were on Darwin's side." Whether gentle Charles Darwin liked it or not, and he did not, the battle began – science versus⁶ religion.

MR. PICKWICK MEETS WITH A ROMANTIC ADVENTURE

(Part I)

(From “The Posthumous Papers of the Pickwick Club” by Charles Dickens,
abridged)

The waiter of the “Great White Horse” preceding Mr. Pickwick and Mr. Magnus down a long dark passage ushered them into a large badly-furnished apartment, with a dirty grate,¹ in which a small fire was making a wretched attempt to be cheerful. After the lapse of an hour, a bit of fish and steak were served up to the travellers, and when the dinner was cleared away, Mr. Pickwick and Mr. Magnus drew their chairs up to the fire, and having ordered a bottle of the worst possible wine, at the highest possible price, for the good of the house, drank brandy and water for their own.

Mr. Peter Magnus was naturally of a very communicative disposition, and the brandy and water warmed into life the deepest hidden secrets of his bosom. After accounts of himself, his family, his connections, his friends, his jokes, his business, and his brothers, Mr. Peter Magnus took a blue view of Mr. Pickwick through his coloured spectacles for several minutes, and then said, with an air of modesty: “And what do you think – what do you think, Mr. Pickwick – I have come down here for?”

“Upon my word,” said Mr. Pickwick, “it is wholly impossible for me to guess on business, perhaps.”

“Partly right, Sir,” replied Mr. Peter Magnus, “but partly wrong, at the same time; try again, Mr. Pickwick.”

“Really,” said Mr. Pickwick, “I must throw myself on your mercy, to tell me or not, as you may think best, for I should never guess, if I were to try all night.”

“Why, then, he – he – he!” said Mr. Peter Magnus, with a bashful titter.² “What should you think, Mr. Pickwick, if I had come down here to make a proposal, Sir, eh? He – he – he!”

MR. PICKWICK MEETS WITH A ROMANTIC ADVENTURE

(Part II)

(From “The Posthumous Papers of the Pickwick Club” by Charles Dickens, abridged)

“Why,” said Mr. Magnus, “to let you into a little secret, think so too. I don’t mind telling you, Mr. Pickwick, although I’m dreadful jealous by nature – horrid – that the lady is in this house.” Here Mr. Magnus took off his spectacles, on purpose to wink, and then put them on again. “She’s a fine creature.”

“Is she?” said Mr. Pickwick.

“Very,” said Mr. Magnus, “very. She lives about twenty miles from here, Mr. Pickwick. I heard she would be here tonight and all tomorrow forenoon, and came down to seize the opportunity. I think an inn is a good sort of place to propose to a single woman in, Mr. Pickwick. She is more likely to feel the loneliness of her situation in travelling, perhaps, than she would be at home. What do you think, Mr. Pickwick?”

“I think it very probable,” replied that gentleman.

“What’s the time, Mr. Pickwick?”

“Past twelve”.

“Dear me, it’s time to go to bed. It will never do, sitting here. I shall be pale tomorrow, Mr. Pickwick.”

At the bare notion of such a calamity,¹ Mr. Peter Magnus rang the bell for the chamber-maid, and retired in company with a candlestick, to one side of the house, while Mr. Pickwick, and another candlestick, were conducted through a multitude of windings, to another.

“This is your room, Sir,” said the chamber-maid.

“Very well,” replied Mr. Pickwick, looking round him. It was a tolerably large double-bedded room, with a fire.

“Nobody sleeps in the other bed, of course,” said Mr. Pickwick.

“Oh, no, Sir.” And bidding Mr. Pickwick good night, the chambermaid retired, and left him alone.

Mr. Pickwick began to undress, when he recollected he had left his watch on the table down stairs.

Now this watch was a special favourite with Mr. Pickwick. The possibility of going to sleep, unless it was ticking gently beneath his pillow, had never entered Mr. Pickwick’s brain. So as it was pretty late now, and he was unwilling to ring his bell at that hour of the night, he slipped on his coat, and taking the candlestick in his hand, walked quietly down stairs.

Discussion

1. What is the author's attitude to the main character of the book. – Mr. Pickwick? Quote from the passage to prove your point.
2. Contrast the two characters – Mr. Pickwick and Mr. Magnus. Quote words from the passage to support your opinion.
3. How is Mr. Peter Magnus made to appear ridiculous?
4. What is the atmosphere of the whole passage? Quote ten examples of Dickens's irony.
5. What human characteristics does Dickens ridicule?
6. What are the chief sources of amusement in the story? (Are they to be found in the plot, in the characters, or in the style?)

Reproduction and Composition

Relate vividly an incident from the selection that you find very amusing. Say what makes it so amusing.

Retell the whole passage as briefly and as simply as you can, placing the events in order of time, omitting anything that you consider unnecessary, and avoiding all repetitions. (About 250 words.)

Write a play of three scenes based on the passage. The dialogue is provided. You will have to describe briefly and clearly the setting of the act (an outline of the appearance of the room; the time) and give a brief outline of the characters on the stage. Enact the play in class.

IV. Retell the text.

“Congratulate me, Mr. Pickwick, she is mine.”

“I congratulate you with all my heart,” replied Mr. Pickwick, warmly shaking his new friend by the hand.

“You must see her, Sir,” said Mr. Magnus; “this way, if you please.” And hurrying on in this way, Mr. Peter Magnus drew Mr. Pickwick from the room. He paused at the next door in the passage, and tapped gently.

“Come in!” said a female voice. And in they went.

“Miss Witherfield,” said Mr. Magnus, “allow me to introduce my very particular friend, Mr. Pickwick. Mr. Pickwick, I beg to make you known to Miss Witherfield.”

The lady was at the upper end of the room. As Mr. Pickwick bowed, he took his spectacles from his waistcoat pocket, and put them on, a process which he had no sooner gone through than, uttering an exclamation of surprise, Mr. Pickwick retreated several paces, and the lady, with a half-suppressed scream, hid her face in her hands, and dropped into a chair, whereupon³ Mr. Peter

In Search of England

One of the greatest discoveries made by Charles Dickens was the name Pickwick.

There is probably no name so well known, or so well loved, in English fiction as Pickwick. So I set my shoulders to investigate the origin of the name, and I discovered at length how Pickwick entered English literature.

When Dickens visited Bath² the White Hart Hotel was owned by a man called Moses Pickwick. This name was written up over the doors of coaches: Moses, in addition to his hotel, owned a profitable stable. The name Pickwick fell on Dickens like a ray of sunlight.

“What a name!” he thought, feeling for his notebook.

² a town in the west of England with hot mineral springs

That was the beginning of the immortalization of Pickwick.

But who was Moses Pickwick, and how did the name originate?

There is a curious story about him. He was, it is said, the great-grandson of a foundling. A woman driving through the village of Wick, near Bath, saw a bundle lying on the side of the road, which proved to contain the first Pickwick. She took him home, cared for him, and christened him Eleazer Pickwick, otherwise Eleazer picked up at Wick!

In the course of time the foundling founded a family in Bath. When Dickens arrived on the scene the great-grandson of Eleazer was a man of wealth and position. Dickens provided the fame . . .

THE WONDERFUL WORLD OF THE THEATRE

(Part I)

(From the book by I. B. Priestley)

What is Theatre? Why has it lasted so long? What does it mean to us? We know that it offers amusement and pleasure, but then so do lots of other things. Is there something special to itself that it offers us? Clearly there is, otherwise the Theatre would not have gone on so long and in so many different places.

During the last thirty years the Theatre has had to meet three challenges from radio, cinema, and television. All three produce drama of a sort; all possess important advantages.

As a rule it doesn't cost as much to see a film as it does to see a play; and films can be seen in a great many places that have never known a theatre. Radio and television can be enjoyed at home, with a minimum of effort, turning the living-room into a playhouse. And all three, because they are produced for a mass audience, can offer casts of players that only the best theatres could afford.

Already many people tell us that with their television sets at home and an occasional visit to the movies, they no longer need the Theatre and do not care whether it lives or dies.

Such people do not understand that the Theatre is the parent of these new dramatic forms. Without a living Theatre where writers, directors,¹ designers² and actors could learn their jobs, movies and television plays would be very crude³ indeed.

In a very good restaurant we have a dinner that is specially cooked for us; in a canteen we are merely served with standard portions of a standard meal. And this is the difference between the living Theatre and the mass entertainment of films, radio and television. In the Theatre the play is specially cooked for us. Those who have worked in the Theatre know that a production never takes its final shape until it has an audience.

Comprehension

THE WONDERFUL WORLD OF THE THEATRE

(Part II)

(From the book by I. B. Priestley)

With films, radio, television, the vast audience can only receive what is being offered. But in the Theatre the audience might be said to be creatively receptive; it's very presence, and intensely living presence, heightens the drama.

The actors are not playing to microphones and cameras but to warmly responsive fellow-creatures. And they are never giving exactly the same performance. If the audience tends to be heavy, unresponsive – on a wet Monday, perhaps – the company slightly sharpens and heightens its performance to bring the audience to life; and vice versa¹ if the audience is too enthusiastic.

Comprehension

What comparison does the author make when he wants to show how different a theatrical production is from that of radio, cinema and television? Do you think the comparison is appropriate here? Why?

When the author says that the people present in the theatre influence the acting, he describes the audience as “creatively receptive”. Explain the meaning of this phrase in your own words.

What, according to the author, is the difference between theatre and film and television acting?

Can you give an example from life to support the author’s assertion that “with a very few exceptions the best performers of film and television are actors and actresses from the theatre”?

What is meant by “commercial conditions”?

How does the author express the idea that commercial conditions represent a danger to the theatre?

What metaphors does the author use in the last paragraph to stress the great role of the theatre?

Explain in your own words the meanings of the adjectives the author uses to describe the theatre – searching, enduring, rewarding, enchanting.

EXERCISES

I. By using following samples, write down below sentences in direct and indirect speech.

Бо истифода аз намунаи зерин ҷумлаҳоро дар нутқи айнаннақлшуда ва мазмунан нақлшуда нависед.

Offer means “say what one is willing to give, pay or do for another person”. E. g. She *offered me* a cup of tea.

When the old lady fell down, no one *offered to help* her.

He *offered to buy* a book for me.

Suggest means “bring a plan, a thought, an idea to a person’s mind”. The verb *suggest* takes a “that”-clause, or a gerund, or a noun, not an infinitive, so we must say:

Our teacher *suggested (to us) a hike* in the country for two days. Our teacher *suggested going* on a hike.

He *suggested that we should play a game of chess*.

Use indirect speech after *suggest* or *offer*.

Examples: “May I take your bag for you?” – I offered to take his bag.

“Let’s go to the pictures.” – He suggested going (that we should go) to the pictures.

1. “I’m going out. Shall I post this letter for you?”
2. “I’m going shopping, can I get anything for you?”
3. “Shall I buy the tickets while you look after the luggage?”
4. “I’m tired, shall we sit down for a while?”
5. “Can I get you a cup of tea?”
6. “Will you have some more cake?”
7. “Mary lives near here, shall we pay her a visit?”
8. “We can send the books next week if you like.”
9. “I’ll take you to the museum tomorrow if you like.”
10. “It’s a fine day, why don’t you go for a walk?”
11. “I can’t do this work alone,” said Tommy.
12. “Well then, I’ll help you,” said Mary.

The Theatre

There are many illusions about the Theatre among people who have never worked in it. One is that what happens on the stage is improvised. Actually, in a serious production the smallest movement, the shortest speech, is carefully rehearsed.

Another illusion is that while acting might be very difficult to the ordinary man, it is very easy for a man born to be an actor. Ability to imitate a voice, a walk, a gesture, is often thought to be enough to make a man an actor. Though there have been great actors with little formal training, most actors nowadays were once students in drama schools.

There they learnt how to use their voice, how to speak clearly, how to control their breathing. They were taught good body-movements; how to walk, to sit down and get up, to dance, to fence. In advanced schools they learnt to observe and interpret character.

Each great capital city has several dramatic schools, some attached to particular theatres, like the Comedie Frangaise in Paris. London's largest dramatic school, the Royal Academy of Dramatic Art, is not attached to any dramatic company but to London University. Russia's Moscow Art Theatre runs its own state-supported school where students selected from all over the vast Soviet Union study for four years. Here the more advanced instruction is based on methods devised by the co-founder of the Moscow Art Theatre, Konstantin Stanislavsky, himself a magnificent actor.

LETTERS TO THE SECRETARY OF STATE FOR AIR¹ CONCERNING HELICOPTERS (Part I)

(a magazine story by H.F. Ellis)

The following is a magazine story written by H. F. Ellis as a series of letters. The story is a good example of satirical writing and, in parts, is very funny indeed. However, to explain a joke is to kill it stone-dead. You will surely notice all the satirical lines.

August 1st, 1958

Sir,

I write to protest about the unreasonable number of times that I am rescued by your helicopters. On the first occasion on which I was snatched from

¹ Minister for Civil Aviation in Britain

the sea while enjoying a quiet float a hundred yards or so away from the shore, I was not angry. This is a normal holiday risk, which in my opinion it is the duty of the public to accept in the right spirit.¹ But enough is as good as a feast.² I have now three times been lifted into the air and carried to St. Mawgan aerodrome, where everybody, I admit, has been most kind and attentive – too kind, if anything. Constant wrapping in warm blankets has given my skin an irritating rash;³⁴ nor am I a man who is very fond of large quantities of hot, sweet tea.

The pilot considers that my habit of floating very low in water makes people on the shore think that I may be drowning. That is as it may be.⁴ I cannot alter my centre of gravity, at will,⁵ to suit your convenience. Surely there is some method of protecting me against the unwelcome efficiency of your Air Rescue organization? Yours faithfully,

H. F. Ellis

August 5th, 1958

Sir,

It is not a good answer to say that anyone can refuse to be rescued if he is not in danger. Quite apart from⁶ the question of good manners, if one attempts to ignore the helicopter or to push the liftingropes aside, the pilot thinks that one is either unconscious or hysterical, and sends a man down by rope-ladder to see about it. Only yesterday, while sunbathing on a small deserted beach, I attempted to move out of the shadow of one of your devilish machines and I was suddenly seized from behind and forcibly placed in a kind of harness made of rough canvas. It is ridiculous to suggest that there was any danger that the beach would be covered by the tide; but the pilot (not the one who generally rescues me, by the way, this was a much more commanding type) refused to listen to my explanation. He simply said that he had his orders and he proposed to obey them – with the result that I was late for lunch for the third day running, and did not dare to take my usual afternoon swim in case I missed a tennis engagement after tea.

¹ they should not be angry about it

² (proverb) Too much of anything is not a good thing.

³ small red spots on the skin

⁴ It may possibly be so.

⁵ whenever I want to do so

⁶ without considering

I shall be obliged if you will take immediate steps to see that your rescue organization turns its attention to some other person on holiday, preferably one who is in need of it.

Yours faithfully,
F. Ellis

Comprehension

1. What happened that made Mr. Ellis write the first letter?
2. Why does he use the proverb "Enough is as good as a feast"?
3. In what way was everybody at St. Mawgan aerodrome too kind to him?
4. Why did people on the shore think that he might be drowning?
5. What did the Secretary of State for Air say in his reply to Mr. Ellis's first letter?
6. Why couldn't Mr. Ellis ignore the helicopter?
7. What had happened the day before, while he was sunbathing on a small deserted beach?

LETTERS TO THE SECRETARY OF STATE FOR AIR¹ CONCERNING HELICOPTERS

(Part II)

August 7th, 1958

Sir!

After a very short interval without trouble (due partly, I think, to my habit of laying out notices with strips of sheeting saying “KEEP AWAY”, whenever I try to find privacy on the rocks and cliffs in this region) the situation has again become bad. I am now constantly followed by a large yellow helicopter, hired, I believe, by a London newspaper to take photographs of any other attempts that may be made to rescue me by air. The noise is indescribable, and whenever I try to escape it by going into a cave or holding my breath under water some busybody² is sure to ring up St. Mawgan aerodrome and bring a second helicopter to the place.

I have noticed, too, that they now keep me hanging in the air, before pulling me up into the rescue machine, for a longer period than was the case at the beginning of my holiday. This, I believe (though I cannot prove it), is done at the request of the photographers. I shall hold you entirely responsible if any

¹ Minister for Civil Aviation in Britain

² an interfering person who is too much interested in other people's affairs

harm comes to me through the almost perpetual draughts to which I am now exposed.

I reopen this letter to add that my wife has just returned in a Royal Air Force truck and in a highly nervous condition from St. Austell, of all places. It appears, so far as I can put the pieces of her story together, that she was violently lifted out of the water while actually sitting on an inflated¹ rubber horse – an inexcusably careless mistake – and taken, horse and all,² to a temporary aerodrome without any proper facilities for caring for people suffering from unnecessary rescue. When I rang up St. Mawgan aerodrome to protest, they told me that their regular rescue helicopter was already out dealing with somebody else (as if I needed to be told that!) when this second call came in. They had accordingly been compelled to ask Plymouth³ for assistance and it might be that the pilot from there was less experienced in rescue work than their own men and “had picked up the wrong bather by mistake”!

Yours faithfully, F. Ellis

Comprehension

1. What had happened the day before, while he was sunbathing on a small deserted beach?
2. Why did Mr. Ellis complain of the pilot in his second letter?
3. Why didn't he dare to take his usual afternoon swim that day?
4. What did Mr. Ellis recommend to the Secretary of State for Air?
5. How did he manage to have a short interval without trouble?
6. Why did a large yellow helicopter begin to follow him?

LETTER WRITING

Certain special formalities are usually observed in letter writing in English. Here are some points for your guidance

1. If you are writing a letter from your home (and not from a place of study or office, etc.) you must always write the whole of your address in the top right hand corner of writing paper. (In the “letters to the Secretary of State for Air” the address of Mr. Ellis was not written in the top right hand corner because these “Letters” were written as a magazine story and space had to be saved).

You must never write your name above the address: the only place for your name is in the signature.

2. Put the number of your house first, then the name of the street (the word Street itself- with a capital letter and then on a separate line, the name of the town.)

25. Rudaki street Dushanbe

II. Write the date below the address.

Санаро дар зери суроға нависед.

March 25th 19 or

March 25,19

III. Opening the closing letter

(Formal)

Opening	Closing
Sir, Madame Dear Sir (Madame) My dear Sir Etc.	Your faithfully Your truly Very sincerely yours

(Informal)

Opening	Closing
Dear Mr. Brown, Dear Mrs. (Miss) Brown, etc.	Your sincerely Very sincerely yours

The signature comes after the closing words.

If you are writing to a relation or to a close friend, your opening and closing need not follow these formalities. You write whatever you wish:

<u>Dear Tom</u> Yours ever,	<u>Dearest Mother,</u> With love
--------------------------------	-------------------------------------

In business letters you should write the address of the recipient. It is placed below your own address and close to the left margin. Now study these two examples of business letters and then do the exercises which follow them.

Intourist
Dushanbe, Tajikistan
Dear Sirs,

I plan to visit Dushanbe in August. Since I do not know anything about travelling conditions in your country, I shall appreciate the cooperation of your Intourist Agency. Please bear in mind the facts set forth below. Accommodation should be first-class.

It is my intention to spend four days in Dushanbe, and I wish to stay near the theatre district.

From Dushanbe I should like to go to Khujand and stay one week, visiting the principal points of interest in and around the city.

Kindly inform me if your Agency arranges for trips of the kind.

I shall be grateful to you if you will send me a booklet dealing with travel in your country.

Yours sincerely,

HEATWAVE IN BERLIN

(Part I)

(Extract from the novel by Dymphna Cusack, abridged)

The novel by Dymphna Cusack, a modern Australian writer, is set in post-war Berlin – Berlin smouldering¹ in the heat of an abnormally hot summer. Joy, a young Australian woman, and her German husband have come on a visit to Berlin from Australia. For Joy, Berlin is a place of parklands and theatres, skyscrapers and fine clothes. But there are sinister ripples under the comfortable surface which Joy cannot ignore. She hears Nazi songs, and sees Nazi slogans on the walls. Gradually she becomes aware of the realities of fascism, both past and present.

* * *

The sun poured down on Berlin's hottest July for two hundred years as Joy sank on to a seat in the shadow of a linden near the main gate of the Zoo.

It was all very beautiful, thick lawns, flower plots a blaze of colour, water from the revolving sprays freshening the torrid² air. She watched Anne's silky blonde head among the crowd around the ice-cream stand. She watched her edge her way out and began to run with an ice-cream in each hand. She came skimming down the path, tripped and fell, and set up a loud wail³ as the two ice-creams went spinning through the air. Before Joy could reach her a shabby old man with a small boy had stooped and picked her up. No damage was done and the wail was solely⁴ for the lost ice-creams.

¹ burning slowly with no smoke

² very hot

³ cry

⁴ only

Comprehension

1. When is the action of the passage set? Find evidence in the passage to support your opinion.
2. Under what circumstances did Joy meet her former teacher, the Professor?
3. Describe the old Professor, as Joy saw him on that hot July day.
4. In what way was he different from the man she used to know in Australia?
5. Why did Joy hesitate to offer the Professor an ice-cream?

EXERCISES

I. Explain in your own words the meaning of the following phrases and sentences as fully as you can.

HEATWAVE IN BERLIN

(Part II)

(Extract from the novel by Dymphna Cusack, abridged)

Joy turned to thank the rescuer and stopped in delight. “Why, Professor! How wonderful to see you again.”

He peered¹ at her through his bifocals.

Joy grasped his hand. “I’m Joy Black.”

His face lit up as he took her hand between his and she felt again with a touch of nausea his distorted fingers.

“Forgive me that I did not immediately recognize you, dear girl. How could I not recognize my favourite pupil!”

“Please come and sit down,” Joy begged him. “It’s much too hot in the sun.”

¹ looked closely

“With pleasure. But first you must meet my grandson, Peter! Here is Fraulein Black.”

Peter bowed stiffly and put out his hand

“Not Black any more. Nor ‘Fraulein’ – Mrs. Miller. And here’s my daughter Anne to prove it.”

Anne bobbed and took his hand.

Joy took a note from her purse and¹ gave it to Anne. “Now you and Peter run and buy four ice-creams and anything else you want.” She hesitated. “Or is it not done here for a distinguished professor to eat ice-cream in public?”

He smiled sadly. “Not professor any more. And not distinguished. And I assure you I treasure so much my Australian years that I would eat the ice-cream even if I were. Ah! - Sydney, Sydney!” he said as, they went towards the shady seat. “Those years I spent there seem like Heaven must have seemed to Lucifer.”² He sat dreamily smiling into the past....

“Do you still teach?”

“No.”

The word dropped, heavy and final, into the conversation. And suddenly Joy saw him as he was – an old and frail man; with a shabby linen coat over threadbare³ trousers. She did not know what to say.

There was a silence as they licked their ice-creams. It seemed so incongruous,⁴ sitting under a lime tree, its scent filling the air that was loud with the drunken buzzing of bees. She was saddened, wondering what lay behind that “No”.

Comprehension

1. Why did his life in Australia, where he was in fact an exile, seem like heaven to him?
2. Why did the Professor’s “No” make Joy silent, sad, and disturbed?
3. How did Joy try to account for the Professor’s evident poverty and his shabbiness?

¹ a feeling of sickness

² *myth*. Satan, the chief rebel angel, who was thrown out of Heaven because of his pride

³ so worn that the threads show

⁴ strange; here: out of place here: realizing

4. What did he mean by saying, "It is not my München any more"?
5. How had Joy come to know the Professor in Australia?
6. Why had she played badly when she had had her first music lesson from him?
7. What had the Professor said and done during the first lesson?

HEATWAVE IN BERLIN

(Part III)

(Extract from the novel by Dymphna Cusack, abridged)

Had he perhaps not been able to adjust himself when he returned, only then perhaps savouring the full extent of his loss? What exactly his loss- had been she had no idea.

“I’ve often wondered where you were”, Joy went on. “When I didn’t hear from you I intended to look you up when we went to Munich.”

“I no longer live in München.” He sighed. “It is not my München any more.”

“You must give me your address so that we can meet again.”

The Professor was not listening. His mind retreated into some lost corner. Hers went back to the day she had had her first lesson from him and she played badly because her eyes kept straying¹ to his purplish² swollen hands. At last he had said to her: “We will stop now and talk a little while, Miss Joy. If you are going to be my pupil, then we must know each other. My hands worry you, do they not?” He spread them on the keyboard, and she closed her eyes feeling that she would be sick.

He answered her unspoken thought.

“I, too, shudder when I see them. I cannot play a scale properly now. But I will let you hear a record I made before they were things of horror.”

He put on the gramophone and a Chopin nocturne filled the air, so delicate, so pure, that she was humbled before her own inadequacy.³

When it was finished, he took her to a photograph on the wall: two hands

¹ wandering

² somewhat purple; bluish-red

³ inability to play as he did

resting on a keyboard, firm, strong, beautifully moulded,¹ so alive that you felt you heard the music that flowed from them.

“Those were the hands that made that music.”

She had cried, and he had stroked her head gently. Whether she had cried in pity for him or shame for herself she hadn’t known. When at last her tears dried he said: “If you are to be my pupil, that is what you must see and hear in your mind, not what your eyes will show you every lesson. If you are a strong girl, then you will succeed. If not, believe me I shall understand, and lose a brilliant pupil with reluctance.”

She had continued to be his pupil and grown to love even the disfigured hands. A romantic, girlish love full of pity and indignation and hate for the men who had ruined them.

Now the pity came back but the indignation and the hatred had been lost somewhere in the years. All that she remembered now was that the Professor was a tragedy among so many tragedies of the Germany that had gone for ever. A world famous musician whose life had been wrecked when he was in his prime.²² Interned in Dachau concentration camp, when he came out he could no longer continue his concert career.

Comprehension

1. “I am a cowardly man,” he said. What evidence is there in the passage to show that it was not so?
2. Why didn’t he flee from Europe as soon as he was released?
3. He had been happy in Australia. What made him come back to Germany?
4. What was his first great disappointment on his return?
5. How did the authorities treat him? Why didn’t he receive the grant he was eligible for?

Discussion

1. In what way could the Professor's fate be considered as typical of the fate of progressive intellectuals in Nazi Germany?

2. How does the author emphasize the contrast between Joy's beautiful present and the sinister past?

3. At what point of the narrative does the atmosphere, the mood, suddenly change? Why?
4. What is the main theme of the passage? What is its main intention?
5. Do you agree with Thomas Mann's words: "Hate is needed. Hate for the scoundrels"? Give reasons for your opinion.
6. Compare the Professor's and Thomas Mann's outlook.
7. Does the author actually tell you what she thinks of the Professor? What devices does she use to build up his character?
8. Suggest a title for the passage and justify your choice.

Reproduction and Composition

1. From what you have read in the passage, piece together the story of the Professor's life.
2. Describe the scene in the office of the ex-SS man to whom the Professor applied for a grant.
3. Write a short account describing the situation in post-war West Germany.
4. Prepare a report on an anti-fascist book you have read or an antifascist film you have seen.
5. You may have read the book "Heatwave in Berlin".
6. What was the fate of the Professor?

"I returned to my country after the war because a rumour had reached me that my daughter was still alive. Besides, I believed, like so many others, that the Nuremberg trials marked the end of Nazi Germany and I owed it to my wife and the world that had suffered at German hands to help in building a new Germany. I was full of passion for a new life, full of belief in justice. I knew I could live and work because they told me I would be compensated for my sufferings and losses – if one can be compensated for the death of one's beloved." He pressed his hands together and touched them to his forehead like a man praying.

"The search began. I found proof that my wife had died in the gas chambers of Auschwitz; I discovered that my brother had been murdered in Buchenwald.

“Eventually¹ the Red Cross found my daughter Brunhilde for me. She had been in Ravensbrick concentration camp at the end of the war. After her release she was in hospital for a very long time. Together we went back to the town where I was born and grew up. By law I was eligible² for an immediate grant³ in compensation. I applied for it.

“I shall never forget the day I went to the office of the authorities. When I went in and told who I was, the official (he had been an SS man) snapped at me: ‘Who let you come back? People like you are a damn’ nuisance. You’ve been slandering⁴ the German Reich for twenty years. Why didn’t you stay where you were?’ He did not even offer me a chair.

“They kept putting off my application on one excuse or another. A newspaper even referred to my ‘prison sentence’ – that is the years I was in concentration camp. Doctor after doctor said there was no evidence that the experiences I had suffered in the freezing chambers in Dachau had anything to do with my arthritic condition. It went on for two years. It became an obsession with me.

“Appeal was useless. The Minister was a Nazi; the head of police was a former SS. The judge – a war criminal.

“I would not listen when Brunhilde told me it was Government policy. I had not lived through the worst years in Germany, and in spite of my years in Dachau, I did not really know to what depths of bestiality my people had sunk.

“I believed that once rid of Hitler and the Nazis, the pure Germanic spirit would reassert itself. I was obstinate, blind, foolish. For years nothing I saw, nothing I learnt, nothing I suffered could teach me that what had reasserted itself was not the Germanic spirit, but the Nazis and Nazism.

“I came back expecting to find the swastika the broad arrow of shame. Instead I found it a magic charm which today brings good fortune to all who wear it.”

He paused, wringing his distorted hands.

“I talked all this over with Thomas Mann – you know him – the great writer. We were close friends. ‘Hate is needed,’ he had said. ‘Hate for the scoundrels who have made the name of Germany stink in the nostrils of God and

the whole world.’ He repeated it and warned me it would get worse, since the Western Powers in whom we had put our faith were building up the old Hitlerian monster again. He begged me to come away with him.

“There is no place for us here,” he said. “We cannot live in such corruption. It is worse now than when I left, for then at least there Was a liberal world outside to which we could appeal. But today, that world is supplying Hitler’s heirs with arms. Their memories are so short – they go open-eyed again to their slaughter.”

I stayed in spite of his warning. I still hoped.

Then I too began to fight.

MARK ANTONY'S FUNERAL ORATION¹ OVER JULIUS CAESAR

(From "Julius Caesar", by William Shakespeare, abridged)

Shakespeare's play "Julius Caesar" is concerned with Caesar's death rather than his life. Caesar lived from 100 B.C. to 44 B. C. He was a Roman general of outstanding military genius who by widespread conquests brought many countries under the Roman sway.² On returning to Rome he should have surrendered his command, but he refused to do so. Pompey, the general in command of the Roman home army, fled to Greece, where Caesar followed and defeated him, thus making himself master of Rome. Rome was a republic, and Caesar retained³ the constitutional forms of the Roman government. The Senate – the Roman Parliament – still met to discuss public affairs. Two Consuls – the chief ministers – were still appointed annually to administer the affairs of state. But Caesar had himself created dictator for life, and so possessed unlimited sovereign powers. This aroused the hostility of many notable Roman citizens, who felt that Caesar was robbing them of their dearest inheritance – democratic and political liberty. Under the leadership of Cassius a conspiracy was formed to murder Caesar; and Brutus, Caesar's closest friend, was persuaded to join. Cassius and his friends may have been moved largely by envy or a desire for revenge; but Brutus was a philosopher, and a man respected in the highest degree for his upright⁴ and unselfish life. No one could reproach him with any personal motive. His consideration was for the good of the commonwealth,⁵ and for this he was

willing to sacrifice even his best friend. After Caesar had been stabbed to death, Brutus made a speech before the Roman citizens explaining the necessity for Caesar's death and trying to win the popular approval for the cause of the conspirators. He succeeded in doing this. Then Mark Antony, one of Caesar's most enthusiastic supporters, made a speech in the dead dictator's honour. By playing upon the emotions of the Romans, he kindled¹ them to fury against the conspirators. Brutus, Cassius, and their friends had to flee from the city, and later they were met in battle by Antony and his party and defeated.

Comprehension

1. How does Brutus justify Caesar's murder?
2. How does Brutus reconcile his own conscience to the murder of his friend?
3. What line of argument does Brutus follow in his speech?
4. How does the crowd react to his speech?
5. Show how Brutus tries to make use of his listeners' patriotism, love of freedom, intelligence?
6. How does Antony answer Brutus's accusation that Caesar was ambitious?

MARK ANTONY'S FUNERAL ORATION¹ OVER JULIUS CAESAR

(Part II)

(From “Julius Caesar”, by William Shakespeare, abridged)

Act III

Scene II.— Rome. The Forum

(Enter BRUTUS and CASSIUS and a throng of CITIZENS.)

Citizens. We will be satisfied: let us be satisfied.

Brutus. Then follow me, and give me audience, friends.

(BRUTUS goes into the pulpit.²)

Brutus. Romans, countrymen, and lovers! hear me for my cause; and be silent, that you may hear. If there be any in this assembly, any dear friend of Caesar's, to him I say, that Brutus' love to Caesar was no less than his. If then that friend demand why Brutus rose against Caesar, this is my answer: Not that I loved Caesar less, but that I loved Rome more. Had you rather Caesar were living, and die all slaves, than that Caesar were dead, to live all free men? As Caesar loved me, I weep for him; as he was fortunate, I rejoice at it; as he was valiant,¹ I honour him; but, as he was ambitious, I slew him. There is tears for his love; joy for his fortune; honour for his valour; and death for his ambition. Who is here so base that would be a bondman? If any, speak; for him have I offended. Who is here so rude that would not be a Roman? If any, speak; for him have I offended. Who is here so vile that will not love his country? If any, speak; for him have I offended. I pause for a reply.

Citizens. None, Brutus, none.

Brutus. Then none have I offended. I have done no more to Caesar, than you shall do to Brutus.

THANK YOU WILLIAM SHAKESPEARE!

I doubt that there’s anyone reading this who goes through a normal day’s conversation without quoting Shakespeare. Once in a while we realize we’re doing this, but most of the time we lift his lines to season our speech without the slightest thought of the source. When you call a man a “rotten apple”, a “blinking idiot”... When you proclaim him a “man of few words” ... When you speak of “cold comfort”, “grim necessity”, the “mind’s eye”, “holding your tongue”, “suing the action to the words” ... When you refer to your “salad

days” or “heart of hearts” ... When you deplore “the beginning of the end” or “life’s uncertain voyage” ...

By God, you’re quoting Shakespeare.

When you use such expressions as “poor but honest”, “in a word”, “second to none”, “a horse of another colour”, “what’s done is done” ...

When you say something is “Greek to me”, or it’s a “mad world” ...

When you complain that you “haven’t slept a wink”, or that your family is “eating you out of house and home”, or you’ve “seen better days” ...

When you speak of a coward “showing his heels” or having “no stomach for a fight” ...

When you nod wisely and say “Love is blind” or “Truth will come to light” ...

You are borrowing your bon mot from the Bard.¹ Without him to put the words in our mouths, we would be

(From “Thank You, William Shakespeare!” by Guy Wright, condensed from “San Francisco News Call Bulletin”)

III. Use «will» or «would» in these sentences instead of the expressions of persistence, and will not (won’t) or would not (wouldn’t) instead of the expressions of refusal.

Дар ҷумлаҳои зерин «will» ё «would»-ро ба ҷойи ифодаҳои истодагари ва «will not (won’t)» ё «would not (wouldn’t)»-ро ба ҷойи ифодаи инкор истифода намоед.

1. He refused to think of the consequences. 2. The man persisted in making remarks, quite audibly too. 3. She refused to discuss the affair. 4. If you persist in ignoring the doctor’s advice, you mustn’t be surprised that you have a nasty cough. 5. Those children persist in slamming the door every time they come or go. 6. The grocer refused to give the poor sculptor his consent to marry his daughter. 7. He made himself disliked because he persisted in sneering at everybody. 8. I am sorry to disappoint you, but I refuse to consent to your plan.

¹ Poet; here Shakespeare

Supply the correct tense of the verbs in brackets. The article was written just before the 400th anniversary of Shakespeare’s birth. Bear this in mind while doing the exercise.

To Be (to)

IV. E. g. “If you **are to be** my pupil, that is what you must see . .

(If we make this arrangement; if we decide, arrange this.)

When the Present or Past Indefinite Tense of the verb to be is followed by an *infinitive*, it shows that an *arrangement* has (or had) been made about the action or that an *order, command, or instruction* has (or had) been given for the action to happen.

Here are some more examples:

I must hurry, I am to meet Mary at six. (It has been arranged.) We were to wait for them at the gate. (It has been arranged.) The doctor said, “You are not to smoke any more.” (Order.) She said that I was not to leave the house. (Indirect command.)

Let us look at another example, taken from the text:

“... the doctor who was already beginning his freezing experiments that were to kill hundreds of prisoners.”

Was to, were to often suggest something that was fated to occur (бояд).

Some other examples:

“Soon afterwards, he went to London to finish work on his journal, which was to become popularly known as The Voyage of the Beagle”.

When he entered the Senate, Caesar did not know that he was shortly to be murdered.

To be to is also used in such set phrases as:

What are we to do? (Мо бояд чӣ кор кунем?)

Where am I to go? (Ман бояд ба кучо равам?)

V. Write sentences with the construction *be to* (in the present or the past) to show that an arrangement has (or had) been made, something was fated to happen, or an order has (or had) been given.

Бо иборати *be to* (дар замони ҳозира ё гузашта) ҷумла тартиб дода, нишон диҳед, ки шартнома баста шуд (баста шуда буд), чизе бояд рӯй меод ё фармон дода шуд (дода шуда буд).

Insert the verbs *be (to)*, *have (to)* or *must* in the correct tenses.

Note: You will remember that *must* expresses necessity in the present and *have to* expresses necessity in other tenses (*had to*, *will have to*). Have

to can also express necessity in the present when the necessity is imposed by circumstances.

Феълҳои «be (to)», «have (to)» ё «must»-ро дар замони дуруст гузоред.

Эзоҳ: Дар хотир нигоҳ доред, ки «must» заруратро дар замони ҳозира ва “have to, had to, will have to” дар замонҳои дигар ифода мекунад. Have to метавонад заруратро дар замони ҳозира вобаста ба шароит ифода кунад.

1. You ... stay here till we return. 2. He ... be here by seven, it's already nine and there is no sign of him. 3. We had our instructions and we knew exactly what we ... do. 4. I see very badly; I ... wear glasses all the time. 5. You ... read the story, it is excellent. 6. I felt so ill that I ... leave early. 7. I never can remember her telephone number; I always ... look it up. 8. Do you know who ... be our new teacher? 9. I ... say you are a nuisance. 10. The matter ... be discussed at tomorrow's debate. 11. There was no gas or electricity in those days. People ... use oil lamps. 12. We got lost in the huge city and ... ask the way.

Some Ways of Expressing Futurity *Going to.*

I. In present day English people seem to be using the going to form more and more in place of the future Indefinite Tense as a pure future. Often however, it shows *intention* or *certainly* on the part of the speaker or writer.

E. g. “If you are going to be my pupil, then we must know each other.” (Intention.)

John is going to wait for us there. (Certainty.)

II. The past tense of the going to form (was going to, were going to) is used as a future in the past, often with the suggestion that the action was planned in the past, but that it didn't in fact take place, or that it will not take place.

E. g. I was going to leave at 10. (But I didn't.)

I was going to leave tomorrow. (But now I have changed my plans.)

Note 1: Both *are you going to* and *will you* can introduce questions about future intentions.

Are you going to is usual in questions about intentions.

Will you very often introduces a request or invitation.

E. g. Are you going to finish this book or shall I take it to the library? Will you open the door for me, please?

Note 2: It is not very usual to use the *going to* form with the verbs *go* and *come* instead we generally use the Present Continuous Tense.

VI. Read the following dialogue giving special attention to the use of “going to”. Then compose a dialogue by “going to”.

Муколамаи зеринро хонда, ба истифодаи “going to” диққати махсус диҳед. Сипас, бо истифода аз “going to” муколама тартиб диҳед.

A: Are you going to watch the football match?

B: I was going to watch it, but I can't now because my brother is arriving in three hours' time, and I'm going to meet him at the station. He was going to arrive yesterday, but he missed the train.

A: Was he going to watch the match too?

B: Well, he was actually going to play in it! He was going to be our goal-keeper, but now- Nick is going to play instead of him. Are you going to be there?

A: Oh, yes. I thought I was going to miss it because I didn't feel well yesterday, but I'm all right now, so I'm going to watch the match.

VII. Translate the following into English using “will you” or “going to” forms.

Чумлаҳои зеринро бо истифодаи “will you” ё “going to” тарҷума кунед.

1. Ман ин чумлаи матнро намефаҳмам. – Ман бародарамро даъват мекунам. Ё ба ту тарҷума мекунад.

2. Шумо ошхонаро таъмир карданӣ ҳастед?

3. Вақте ки ту мактабро хатм мекунӣ, чӣ кор кардан мехоҳӣ? – Ман мехоҳам геолог шавам.

4. Ман ба бозии футбол меравам. Ҳамроҳи ман меравӣ? – Ташаккур, бо камоли майл.

5. Телефон боз занг зада истодааст. Лутфан гӯшакро гир. – Ту гӯшакро намебардорӣ?

6. Шумо шасти моҳигириатонро ба ман намедихед? – Марҳамат. Ту аз кучо моҳӣ доштани ҳастӣ?
7. Ту хӯрокро хом хӯрдани ҳастӣ? Бемор мешавӣ.

THE MEXICAN

(Part I)

(By Jack London, abridged)

Nobody knew his history – they of the Junta¹ least of all... . The day he first drifted into their crowded, busy rooms they all suspected him of being a spy . . .

At the first sight the boy did not impress them favorably. Boy he was, not more than eighteen and not overlarge for his years. He announced that he was Felipe Rivera, and that it was his wish to work for the revolution. That was all – not a wasted word, no further explanation... . There was something venomous² and snakelike in the boy's black eyes. They burned like cold fire, as with a vast, further explanation bitterness... .

Paulino Vera looked questioningly at Arrellano and Ramos, and questioningly they looked back and to each other. The indecision of doubt brooded in their eyes... . But Vera, always the most impulsive, the quickest to act, stepped into the breach.

“Very well,” he said coldly. “You say you want to work for the revolution. Take off your coat. Hang it over there. I will show you – come – where are the buckets and cloths. The floor is dirty. You will begin by scrubbing it, and by

scrubbing the floors of the other rooms. The indecision need to be cleaned. Then there are the windows.”

“Is it for the revolution?” the boy asked.

“It is for the revolution,” Vera answered.

Rivera looked cold suspicion at all of them, then proceeded to take off his coat.

“It is well,” he said.

And nothing more. Day after day he came to his work – sweeping, scrubbing, cleaning... .

He slept they knew not where, and ate they knew not where norhow. Once Arrellano offered him a couple of dollars. Rivera declined the money with a shake of the head. When Vera joined in and tried to press it upon him, he said:

“I am working for the revolution.”

It takes money to raise a modern revolution, and always the Junta was pressed. The members starved and toiled, and the longest day was none too long, and yet there were times when it appeared as if the revolution stood or fell on no more than the matter of a few dollars. Once, the first time, when the rent of the house was two months behind and the landlord was threatening dispossession,¹ it was Felipe Rivera, the scrub boy in the poor, cheap clothes, worn and threadbare, who laid sixty dollars in gold on May Sethby’s desk.

Comprehension

1. What was it in Rivera’s appearance and manners that made an unfavourable impression upon the revolutionaries?
2. What simile does the writer use to describe Rivera’s eyes?
3. Do you think Rivera had expected to be given a job of a scrub boy? Did he show disappointment? (Quote from the text to support your answer.)
4. What evidence can you find to show that the revolutionaries did not trust Rivera?
5. Why did Rivera decline to take the money offered him as a reward for the job he was doing for the Junta?

HISTORIC ANNIVERSARY

We (think) of Shakespeare not as dead, but as living on in his plays and poems; in fact, never perhaps he (be alive) as he (be) today, when the memory of his birth four hundred years ago (the celebrated) not only by his fellow-countrymen, but also by his fellow- men all over the world.

Here, in this country, the four hundredth birthday of Shakespeare (not pass unnoticed or uncelebrated).

Thanks to the efforts of the Soviet-British Friendship Society and the co-operation of many universities and colleges, numerous projects already (be) and still (be undertaken) to celebrate this occasion.

Many Shakespeare exhibitions already (be displayed) at libraries; there (be) at present a splendid exhibition of British books on show at the Lenin Library.

Similar exhibitions also (be arranged) at other libraries. Above all, the plays themselves of Shakespeare (be discussed) in new books and articles, and (be performed) not only in Russian by professional companies of actors, but also in English at many schools and universities.

Now, perhaps, amid the festivities, (be) the occasion for reflecting why we (celebrate) the memory of Shakespeare with so much enthusiasm this year. It (be) merely because he (be) so famous a poet, and because everyone else (celebrate) his memory this year?

That would hardly be a reasonable answer, and in any case it (pose) the further question: Why Shakespeare (be) so famous a poet, and why people (have) to celebrate the fourth century of his birth the world over? It may truly be claimed that, more than any other dramatist in the world, he (succeed) in his plays in touching the deepest chords of the human heart.

THE MEXICAN

(Part II)

(By Jack London, abridged)

Rivera's ways and times were truly mysterious. There were periods when they did not see him for a week at a time. These occasions were always capped¹ by his return, when, without advertisement or speech, he laid gold coins on May Sethby's desk. Again, for days and weeks, he spent all his time with the Junta. And yet again, for irregular periods, he would disappear through the heart of each day, from early morning until late afternoon. At such times he came early and remained late. Arrellano had found him at midnight, setting type² with fresh-swollen knuckles, or mayhap³ it was his lip, new-split, that still bled.

II

The time of the crisis approached. The need for money was greater than ever before, while money was harder to get. Patriots had given their last cent and now could give no more... . And it was guns and ammunition, ammunition and guns – the unceasing and eternal cry... . The ragged battalions must be armed. But how? . . .

“To think that the freedom of Mexico should stand or fall on a few paltry⁴ thousands of dollars,” said Paulino Vera.

Despair was in all their faces... .

Rivera, on his knees, scrubbing, looked up, with suspended⁵ brush, his bare arms flecked with soapy, dirty water.

“Will five thousand do it?” he asked.

They looked their amazement. Vera nodded and swallowed. He could not speak, but he was on the instant invested with a vast faith.

“Order the guns,” Rivera said, and thereupon was guilty of the longest flow of words they had ever heard him utter. “The time is short. In three weeks I shall bring you the five thousand. It is well. The weather will be warmer for those who fight. Also, it is the best I can do.” ...

He got up, rolled down his sleeves, and put on his coat

“Order the guns,” he said. “I am going now.”

THE MEXICAN

(Part III)

(By Jack London, abridged)

III

After hurrying and scurrying, much telephoning and bad language, a night session was held in Kelly's office. He had brought Danny Ward out from New York, arranged the fight for him with Billy Carthey, the date was three weeks away, and for two days now, carefully concealed from the sporting writers, Carthey had been lying up, badly injured. There was no one to take his place. . . . And now hope had revived, though faintly.

"You've got a hell of a nerve,"¹ Kelly addressed Rivera, after one look, as soon as they got together.

Hate that was malignant² was in Rivera's eyes, but his face remained impassive.

"I can lick³ Ward," was all he said.

"How do you know? Ever see him fight?"

Rivera shook his head.

¹ (slang) you've got extraordinary impudence

² very evil

³ beat; overcome

“He can beat you up with one hand and both eyes closed.”

Rivera shrugged his shoulders.

“Haven’t you got anything to say?” the fight promoter¹ snarled.²

“I can lick him.”

“Well, you know Roberts. He ought to be here. I’ve sent for him.”

When Roberts arrived it was patent³ that he was mildly drunk.

Kelly went straight to the point.

“Look here, Roberts, you’ve been bragging⁴ you discovered this little Mexican. You know Carthey’s broken his arm. Well, this little yellow streak⁵ has the gall⁶ to blow in today and say he’ll take Carthey’s place. What about it?”

“It’s all right, Kelly,” came the slow response. “He can put up a fight.”

“All right,” Kelly turned to his secretary. “Ring up Ward. I warned him to show up if I thought it worth while.”

. . . Danny Ward arrived. Quite a party it was. His manager and trainer were with him. Greetings flew about, a joke here, a retort there, a smile or a laugh for everybody.

“So that’s the guy,”⁷ Danny said, running an appraising⁸ eye over his proposed antagonist. “How do you do, old chap.”

Rivera’s eyes burned venomously, but he made no sign of acknowledgment. He disliked all gringos,⁹ but this gringo he hated with an immediacy that was unusual even in him.

“What kindergarten did you get in from?” asked Danny.

“He’s a good little boy, Danny,” Roberts defended. “Not as easy as he looks.”

“And half the house is sold already,” Kelly pleaded.

“Then let’s get down to biz.”¹⁰ Danny paused and calculated. “Of course, sixty-five percent of gate receipts, same as with Carthey. But the split’ll be different. Eighty will just about suit me.” And to his manager, “That right?”

The manager nodded.

Language is like the air we breathe. It's invisible, inescapable, indispensable, and we take it for granted. But when we take the time, step back, and listen to the sounds that escape from the holes in people's faces and explore the paradoxes and vagaries of English, we find that hot dogs can be cold, dark-rooms can be lit, homework can be done in school, nightmares can take place in broad daylight, while morning sickness and daydreaming can take place at night, tomboys are girls, midwives can be men, hours – especially happy hours and rush hours – can last longer than sixty minutes, quicksand works

very slowly, boxing rings are square, silverware can be made of plastic and tablecloths of paper, most telephones are dialed by being punched (or pushed?), and most bathrooms don't have any baths in them. In fact, a dog can go to the bathroom under a tree – no bath, no room; it's still going to the bathroom. And doesn't it seem at least a little bizarre that we go to the bathroom in order to go to the bathroom?

Why is it that a woman can man a station but a man can't woman one, that a man can father a movement but a woman can't mother one, and that a king rules a kingdom but a queen doesn't rule a queendom? How did all those Renaissance men reproduce when there don't seem to have been any Renaissance women?

A writer is someone who writes, and a stinger is something that stings. But fingers don't fing, grocers don't groce, hammers don't ham, and humdingers don't humding, if the plural of tooth is teeth, shouldn't the plural of booth be beeth? One goose, two geese – so one moose, two meese? One index, two indices – one Kleenex, two Kleenices? If people ring a bell today and rang a bell yesterday, why don't we say that they flang a ball? If they wrote a letter, perhaps they also bote their tongue. If the teacher taught, why isn't it also true that the preacher praught? Why is it that the sun shone yesterday while I shined my shoes, that I treaded water and then trod on soil, and that I flew out to see a World Series game in which my favorite player flied out?

The Truth about the Mexican Revolution

In the year 1910 Mexico was ruled by the dictatorial power of Porfirio Diaz. In fact, Diaz eliminated the Constitution that had been won by the Mexican people in the long struggle for independence from Spain and the Catholic Church. Though officially the Constitution remained the law of the land, Diaz acted according to the old Spanish maxim regarding inconvenient laws “Observe, do not fulfil”.

Diaz granted concessions to foreign railway companies. Railways constructed with Mexican money became wholly the property of foreigners.

In every branch of the national wealth Diaz favoured monopoly. Even fishing rights were granted to foreign companies, native fishermen being left without the means of living.

In many ways – some of them amounting to crime – Diaz assisted large landowners to absorb small properties, compelling their former owners to serve as labourers on the larger farms created from what had been stolen from them. All the towns of the country in this way lost their commons; and many that were formerly prosperous fell into a sad state of poverty, because they had been deprived of the only means of existence – the pursuit of agriculture.

Under the rule of Porfirio Diaz foreigners were specially favoured by the Government, and enjoyed special privileges not shared by the natives.

ENGLISH IS A CRAZY LANGUAGE

By R. Lederer

English is the most widely spoken language in the history of our planet, used in some way by at least one out of every seven human beings around the globe. Half of the world's books are written in English, and the majority of international telephone calls are made in English. English is the language of over sixty percent of the world's radio programs, many of them beamed, ironically, by the Russians, who know that to win friends and influence nations, they're best off using English. More than seventy percent of international mail is written and addressed in English, and eighty percent of all computer text is stored

in English. English has acquired the largest vocabulary of all the world's languages, perhaps as many as two million words, and has generated one of the noblest bodies of literature in the annals of the human race.

Nonetheless, it is now time to face the fact that English is a crazy language.

In the crazy English language, the blackbird hen is brown, blackboards can be blue or green, and blackberries are green and then red before they are ripe. Even if blackberries were really black and blueberries really blue, what are strawberries, cranberries, elderberries, huckleberries, raspberries, boysenberries, mulberries, and gooseberries supposed to look like?

To add to the insanity, there is no butter in buttermilk, no egg in eggplant, no grape in grapefruit, neither worms nor wood in wormwood, neither pine nor apple in pineapple, neither peas nor nuts in peanuts, and no ham in a hamburger. (In fact, if somebody invented a sandwich consisting of a ham patty in a bun, we would have a hard time finding a name for it.) To make matters worse, English muffins weren't invented in England, french fries in France, or danish pastries in Denmark. And we discover even more culinary madness in the revelations that sweetmeat is candy, while sweetbread, which isn't sweet, is made from meat.

In this unreliable English tongue, greyhounds aren't always grey (or gray); panda bears and koala bears aren't bears (they're marsupials); a woodchuck is a groundhog, which is not a hog; a horned toad is a lizard; glowworms are fireflies, but fireflies are not flies (they're beetles); ladybugs and lightning bugs are also beetles (and to propagate, a significant proportion of ladybugs must be male); a guinea pig is neither a pig nor from Guinea (it's a South American rodent); and a titmouse is neither mammal nor mammaried.

THE TWO CULTURES

(From a lecture by C. P. Snow)

In 1959, Sir Charles Snow, better known as C. P. Snow, the novelist, delivered a lecture at Cambridge under the title “The Two Cultures and the Scientific Revolution”. This lecture was circulated widely and aroused a lot of controversy. It was clear that Snow had touched on something important that people had realized only dimly before. Snow argued that the effect of over-specialization has been to create two “cultures” of science and the arts, quite different in their approach to life and often opposed to each other. Of course he bases his criticism on England but his aim is to show that this is a serious tendency in much of the Western world.

Here are some passages from the lecture.

* * *

I believe the intellectual life of the whole of western society is increasingly being split into two polar groups. At one pole we have the literary intellectuals, at the other scientists, and as the most representative, the physical scientists. Between the two, a gulf of mutual incomprehension¹ – sometimes (particularly among the young) hostility and dislike, but most of all lack of understanding. They have a curious distorted image of each other.

The non-scientists have a rooted² impression that the scientists are shallowly optimistic, unaware of man's condition. On the other hand, the scientists believe that the literary intellectuals are totally lacking in foresight, peculiarly unconcerned with their brother men, in a deep sense anti-intellectual.

There are about fifty thousand working scientists in the country and about eighty thousand professional engineers or applied scientists.³ During the war and in the years since, my colleagues and I have had to interview somewhere

¹ inability to understand

² deep and firm

³ We distinguish between pure scientists, who do fundamental research into their subjects, and applied, who apply scientific methods to practical problems.

between thirty to forty thousand of these, that is, about 25 per cent. The number is large enough to give us a fair sample. We were able to find out a certain amount of what they read and thought about. I confess that even I, who am fond of them and respect them, was a bit shaken. We hadn't quite expected that the links with the traditional culture should be so tenuous,¹ nothing more than a formal touch of the cap.

As one would expect, some of the very best scientists had and have plenty of energy and interest to spare, and we came across several who had read almost everything that literary people talk about. But that's very rare.

Most of the rest, when one tried to probe for² what books they had read, would modestly confess, "Well, I've tried a bit of Dickens. ..."

But what about the other side? They are impoverished too – perhaps more seriously, because they are vainer about it. They still like to pretend that the traditional culture is the whole of "culture", as though the natural order³ didn't exist. As though the scientific edifice⁴ of the physical world was not, in its intellectual depth and complexity, the most beautiful and wonderful collective work of the mind of man. Yet most non-scientists have no conception of that edifice at all. Even if they want to have it, they can't. This ignorance doesn't come by nature, but by training, or rather the absence of training.

Comprehension

1. What do you think what is meant by over-specialization?
2. What tendency does the author see in the intellectual life of the western society?
3. What do the scientists and non-scientists accuse each other of?
4. Why does he think that the other side (the literary intellectuals) are still more impoverished?

EXERCISES

I. Read the following text carefully two or three times.

Матни зеринро бодиккат ду ё се маротиба хонед.

¹ thin

² here: to find out

³ nature and its laws

⁴ a large imposing building

“Nuriya was born in Dushanbe in 1961. She went to school when she was seven. A year later she began to learn English at school and continued to do so until she left school in 1978 and went to work in the Tajik National Library. It is now 1990. Nuriya still lives in Dushanbe and she still works at the Tajik National Library.”

Now answer the following questions, repeating the tense forms in your answer. Name all the tenses used.

1. How old was Nuriya when she began to learn English?
2. How long had Nuriya been at school when she had studied English for two years?
3. By 1973 how long had Nuriya been at school?
4. How long has Nuriya been living in Dushanbe?
5. How long did Nuriya learn English at school?
6. How long is it since Nuriya left school?
7. How long had Nuriya been living in Dushanbe when she went to work in the Agency?
8. How long has Nuriya been working at the Agency?
9. How much longer has Nuriya been working at the Tajik National Library than she was at school?
10. By 1994 how long will Nuriya have been working at the Tajik National Library?

II. Translate the following extract.

Порчаи матни зеринро тарҷума кунед.

This extract is from the book called “The Penicillin Man” by John Rowland. The book is about Alexander Fleming, the scientist who discovered penicillin.

There are two types of scientist really, and there is little doubt as to which type Fleming belonged. One type is the scientist who is interested in research but who has no very active curiosity. He likes the work of the scientist and he is prepared to do anything that he is asked to do. A great chemical firm, say, decides that it would like to try to work out a new kind of plastic – like nylon. It therefore fits up a laboratory, tells the staff appointed there what is wanted, and then lets them get on with the job. That is the kind of work which is done by many good scientists, though they will rarely be the greatest of all.

On the other hand, there are scientists (of whom Fleming was certainly one) who feel intense curiosity about some side of their science. They cannot work to order; they have to follow out their ideas in whatever direction seems best; and they concentrate on a problem which appeals to them. It is really a matter of the old distinction, mentioned earlier in this book, between the pure scientist and the applied scientist. Fleming was a pure scientist. What he did was done because he was interested in it and not because he was paid to do it.

THE TWO CULTURES

(Part II)

(From a lecture by C. P. Snow)

The non-scientists don't know what they miss. They give a pitying chuckle¹ at the news of scientists who have never read a major work of English literature. They dismiss them as ignorant specialists. Yet their own ignorance and their own specialization is just as startling.² A good many times I have been present at gatherings of people, who, by the standards of the traditional culture, are thought highly educated and who have been expressing their incredulity³ at the illiteracy of scientists. Once or twice I have been provoked and have asked the company how many of them could describe the Second Law of Thermodynamics. The response was cold; it was also negative. Yet I was asking something which is about the scientific equivalent of: Have you read a work of Shakespeare's?

Now believe that if I had asked an even simpler question – such as “What do you mean by mass, or acceleration?” which is the scientific equivalent of: “Can you read?” – not more than one in ten of the highly educated would have felt that I was speaking the same language. So the great edifice of modern physics goes up, and the majority of the cleverest people in the western world have about as much insight into it as their neolithic ancestors would have had.

There is only one way out of all this: it is, of course, by rethinking our education. Nearly everyone will agree that our school education is too specialized. Other countries are as dissatisfied with their education as we are, but they are not resigned.⁴

The US teach out of proportion⁵ more children up to eighteen than we do: they teach them far more widely, but nothing so rigorously.⁶ They know that: they are hoping to take the problem in hand within ten years. The USSR also teach far more widely than we do (it is an absurd western myth that their school education is specialized) but much too rigorously. They know that and they are beating about⁷ to get it right.

Comprehension

1. Why does he think that the other side (the literary intellectuals) are still more impoverished?
2. What do the literary intellectuals call most scientists?
3. By what standards do they (the literary intellectuals) judge people?
4. According to Snow, what questions from the field of physics are the equivalents of “Can you read?” and “Have you read a work of Shakespeare’s?”
5. In what connection does the author mention our neolithic ancestors?
6. What way does Snow see out of all this?

Discussion and Composition

1. What danger does Snow see in the tendencies of modern culture?
2. Do you think these tendencies are natural? Explain your point of view.
3. What importance does Snow attach to education? Give your reasons for agreeing or disagreeing with him.
4. Can you answer the three questions Snow poses? Do you think literary intellectuals should be able to answer questions like these? Discuss this.
5. Does the problem of the “two cultures” exist in our country? If so, how do you suggest it can be solved?
6. There is a lot of controversy among educationalists as to whether early specialization is necessary. What do you think about it?
7. Make a report about a scientist who is (or was) also vastly interested in the arts (literature, music, painting, etc.).

Economics of Tajikistan

The purpose of business is to create and keep a customer

Henry Ford, (1863-1947), American industrialist, founder of Ford Motor company.

Our country has been implementing economic reforms on a regular basis. In the years of independence steady economic and social reforms started. After the Civil War, when the peace treaty was concluded, the country's economy started growing. The main branches of production are: cotton, ginning, silk spinning, food processing, winemaking, carpet weaving, metals processing, textile weaving, chemicals, fertilizers, and cement making.

Tajikistan is well provided with hydroelectric resources. Trade was primarily conducted with neighboring countries. Tajikistan joined the World Trade Organization.

The main industrial enterprise of Tajikistan is Tajik Aluminum Company, which is considered by our President "the business card of Tajikistan's industry". The Tajik Aluminum Plant was one of the most powerful industrial enterprises in the country. In 2007 it was renamed into "Tajik Aluminum Company" (TALCO). The construction of the plant began in 1972 and the first flow of aluminum took place on March 31, 1975. TALCO is one of the largest global manufactures of aluminum and the most dynamically developing company. TALCO has been constructed on modern management and international system of financial statements. It became an embodiment of economic reforms in Tajikistan.

BENEFITS OF LABOUR CLASS OR TECHNOLOGY AT SCHOOLS

Every person has possibility to choose any kind of work he wants for his future life: intellectual work or manual labour. There were labour classes at school in the past and a lot of people remember it positively but others not. But nowadays in Tajikistan it is renamed from the labour class into technology. It is not the same with computer technology.

If there are any benefits from the labour classes or not, why these classes must or mustn't conduct at schools. There are different opinions and it has pluses and minuses. Nobody asks the children what they want to learn because it is compulsory. Let's try to figure out the pluses and minuses of having the shop classes at school.

Pluses of the labour classes:

- Allows children to have a rest from other subjects.
- Helps the formation of certain skills.
- Unites children and teaches them to work in a group.
- Increases the love of children toward work.
- It allows for a having a good time
- Develops the creative nature of the child.
- It helps to learn something new.

Minuses of the shop classes:

I want to be a journalist

I decided to be a journalist. I think it is an interesting and usefull profession.

I like to watch TV, listen to the radio, read newspapers and magazines. I like everything which connected with mass media. That's why I have entered the Khujand State University named after academician Bobojon Gafurov to the faculty of Tajik Philology. Now I am a student of the journalistic department of this faculty.

I have a hobby. My friends and I are publishing a small newspaper once a month in our faculty. We write articles about faculty events, life of young people, jokes, draw pictures and caricatures. My favorite subjects are history, literature, English and Russian.

I like a profession of journalist. They meet many people. They try to understand what is going on in the world, or in the country, or in the city and try to explain it to other people.

I think that the work of a journalist is very much like that of historian. A historian studies and tries to explain events of the past and a journalist does the same about the present.

But for me to be a journalist is much more interesting than to be a historian because you deal with historian studies that are happening right now so you can even influence them.

So journalists can influence the history. That is why I want to be a journalist.

Nature's building blocks

Nature's building blocks is an alphabetical listing of all known elements with each one being discussed under the following headings derivation of the name its presence in the human body and in the diet its possible role in medicine. The history of its discovery its economic importance its role in warfare its environmental impact its basic chemistry and finally a section element of surprise which reveals some unexpected aspect.

The founder of Nature's building blocks is considered D. I. Mendeleev.

D. I. Mendeleev, the great Russian scientist, was born in Tobolsk in 1834. After finishing school at the age of 16 he went to St. Petersburg and entered the Pedagogical Institute. He graduated from the Institute in 1855. In 1866 Mendeleev was appointed professor at the University where he gave a course of lectures on chemistry. His lectures were always listened to with great interest

and attention. Even in a class of two hundred students everyone was able to follow his discussions from the beginning to the end.

Interesting experiments were made in his classes. Both he and his students-assistants worked long hours in preparing the demonstrations so that all would go well.

At the university Mendeleev taught classes in the morning. In the afternoon he made experiments in his two-room laboratory. At night Mendeleev spent much of his time working with the cards on which he put down information about each of the chemical elements.

Mendeleev made thousands of experiments with his own hands. He made thousands of calculations, wrote a lot of letters, and studied many reports. Everything in the world that was known about the chemical elements Mendeleev knew. For months, for years he searched for missing data. All those data were being brought together and grouped in a special way. In 1869 the description of more than 60 elements was completed, and Mendeleev published his Periodic Table.

The Periodic Table is spoken of as the beginning of a new era in chemical thought.

In addition to this work Mendeleev paid much attention to many subjects of an applied chemical nature. He was the first to put forward the idea of studying the upper layers of atmosphere.

Mendeleev was elected member of many academies abroad.
He died in February 1907 at the age of 75.

What's the difference between grasses and weeds

Weeds are any plants that are useless to humankind, have little economic value, or simply are growing where you don't want them.

Grasses are green plants with long, slender leaves that grow in two vertical rows on opposite sides of a jointed stem. As a result, the plant looks like a split tube.

Grasses also produce small, dry, one seeded fruits that are sometimes arranged in clusters.

Even though the difference between grasses and weeds are clear, people often misuse the terms. If it grows in their lawns, and if people are willing to mow it, they probably call it grass. (Unfortunately, quite a few weeds also grow in lawns, such as dandelions and crabgrass.)

If grazing animals will eat it, it's also probably called grass. Many aquatic (water) plants are called weeds, especially seaweeds. So are the leafy parts of some herbs, such as dillweed.

Did you know?

Most of the valuable cereal grains – corn, wheat, oats, rice, barley, rye, and wild rice – are grasses.

Sugarcane is a grass. So is sorghum, which looks like a cross between corn and sugarcane. Sorghum is grown in America for animal fodder. In many other countries, sorghum is also used for grain and to make syrup.

ARTS

Painting, sculpture and wood carving are three of what we call the arts. Nobody knows which of the arts is the oldest.

We know that cave-man drew pictures on the walls of their caves. They carved the handles of some of their bone knives into figures of animals.

We know that the Egyptians and Babylonians planned and built beautiful buildings several thousand years ago. They decorated their pottery and wove beautiful cloth.

What people find around them in the places they live has a great deal to do with how they tried to bring beauty into their homes and lives. The people of the North carve beautiful figures out the ivory or walrus tusks. But they do not plan big and beautiful buildings. With nothing, but snow, driftwood and skins, they cannot build such buildings.

The Indians of the American South-West make lovely silver jewelry set with turquoise.

All works of art are alike in one way. They all have some kind of design. In his work an artist often expresses some deep feeling. It may be joy, sorrow or fear. It may be a feeling of calm or of excitement. It may be love of country or nature. A work of art should give the person who sees or hears it the same feeling.

In this way the art is a kind of language often easier for some people to understand than spoken words.

TAJIK TRADITIONAL CLOTHES

Tajik traditional clothes differ from region to region in terms of color; embroidered patterns, style. But there are some common features in our national costumes.

The most popular items of the Tajik national clothing are: a tunic-type shirt, wide trousers, a quilted dressing gown, a waist scarf, a skull-cap or a turban, leather boots, galoshes with pointed toes (which are frequently worn over boots) - for men, a tunic-type dress, wide trousers, a kerchief or a skull-cap - for women. Modern peasants still adhere to the national style in clothing.

Girls and women wear skullcaps and scarves mostly for various occasions (weddings, birthdays). National jewelry is mostly made of silver or gold: necklaces, pendants, earrings and rings are very massive, forged and embossed.

Men wear cloth belts, decorated with embroidery of various colours.

Toqi - kallapush (skull cap) is a traditional item of the national Tajik clothing. The most popular are men's black and white skull caps called "chusti". Alongside with them, light semi-spherical machine-embroidered skull caps are also worn in some areas of Tajikistan. Women wear square skull caps with bright "floriated" patterns embroidered with cross stitch. Tajik round flat-bottomed skull caps embroidered with satin stitch with colored silk sewing are also known in Pamir.

Tajiks piously revere their national traditions, pre-serve and pass them from generation to generation practically within their original context.

AN ARTIST

The artist – is more, than a trade. This is condition of soul. We shall assume, you cover with drawing colors, seize a structure of the schoolmate on fields and having got in a museum, is bewitched stiffen before the liked picture. You see casual beauty in a daily life, and you have an insuperable desire to express it by means of a pencil or paints. Means, you have a main thing that is necessary for the future artist – figurative perception.

Artists are engaged in very different kinds of art: painting, a sculpture, an animation (creation of comics or cartoon films), arts and crafts ... and at everyone – the way to inform up to the spectator beauty of world around. For example, painters write pictures oil or a water color, and the main is feeling color. By means of color they transfer the thinnest shades of mood; in color scale of a picture you can catch transparent shivering morning air or heavy darkness of winter night. For schedules the main tool is a line. Here the person, some black lines on a white background – and seems to you, that you know all about the drawn person. If you empathize, plunge into a picture, a sculpture, cannot tear off a sight from a decorative casket or a vase, means; they are created by the present master.

Dear Mum and Dad,

I have got a new friend on the Internet called Parviz. He comes from Bishkek, a capital of Kyrgyzstan. He is twenty-four years old and is a student at Bishkek University. He studies French and English there. He loves Asian food and eats out with friends often. He also loves listening to music and going to the theatre in his free time. Once a month he goes to his favorite cafe with his friends. He likes using the Internet to chat with people. He doesn't like cats.

I hope he writes again soon!
